

**National Interagency Coordination Center
Incident Management Situation Report
Friday, June 2nd, 2017 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (83 new fires)
New large incidents:	4
Large fires contained:	4
Uncontained large fires:**	3
Area Command Teams Committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	0

**Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 3)

New fires:	16
New large incidents:	1
Uncontained large fires:	1
Type 1 IMTs Committed	1

* **Kellogg**, Southeast Area, Arizona DOF. One mile southwest of Sonoita, AZ. Brush and tall grass. Active fire behavior with running, flanking and wind driven runs. Residences threatened. Evacuations in effect.

Pinal, Tonto NF. Transfer of command from IMT 1 (Day) back to the local unit will occur today. Six miles south of Globe, AZ. Timber and chaparral. Minimal fire behavior with creeping and smoldering. Numerous structures threatened. Road, area and trail closures in effect.

Dove, San Carlos Agency, BIA. Thirty miles northeast of San Carlos, AZ. Previously reported incident. Hardwood litter and short grass. Moderate fire behavior. Last report unless significant fire activity occurs.

Snake Ridge, Coconino, NF. Previously reported incident. Thirty-four miles southeast of Flagstaff, AZ. Timber, brush, and short grass. Moderate fire behavior with creeping and smoldering. Structures threatened. Area closures in effect. Last report unless significant fire activity occurs.

Baca, Gila, NF. Previously reported incident. Twenty miles southwest of Quemado, NM. Short grass and timber. Moderate fire behavior with backing, creeping, and smoldering. Road closures in effect. Last report unless significant fire activity occurs.

Predictive Services Discussion: Cooler conditions will prevail across the west as temperatures return to normal levels. Scattered wet convection will be possible across the mountains of the northwestern corner of the Lower 48. A cold front will move east into the central Plains bringing scattered, strong storms. Cool and wet conditions are expected across the Great Lakes region and the Northeast as a strong but compact area of low pressure quickly moves southeast across the region. More precipitation is expected across Florida and southern Georgia as a stationary front remains anchored along the Gulf Coast. Looking north, the ridge of high pressure over Alaska will remain anchored over the interior of the state and will lead to a continuance of the warm, dry pattern.

SPOT WEATHER FORECAST

Weather / Fire Behavior Category

Spot weather forecasts should be requested or submitted online for those fires that have potential for extreme fire behavior, exceed initial attack, or are located in areas where Red Flag Warnings have been issued.

● Basic elements needed for a spot weather forecast include:

- Name of fire and management agency
- Request time and date
- Location by ¼ section
- Drainage name
- Exposure
- Size
- Elevation (top and bottom)
- Fuel type
- Fire character (ground, crown, etc.)
- Weather conditions (place, elevation, observation time, wind direction, wind velocity, dry bulb, wet bulb, remarks and important U.S. indicators)

Activity: Calibrate your Kestrel and review belt weather kit use.
