

**National Interagency Coordination Center  
Incident Management Situation Report  
Sunday, June 4th, 2017 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (54 new fires)
New large incidents:	1
Large fires contained:	0
Uncontained large fires:**	4
Area Command Teams Committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	0

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

**Southern Area (PL 2)**

New fires:	5
New large incidents:	0
Uncontained large fires:	1
Type 1 IMTs committed:	1
NIMOs committed:	1

**West Mims**, Okefenokee National Wildlife Refuge. Unified command between Florida IMT 1 (Leneave) and NIMO (Quesinberry). Sixteen miles southeast of Fargo, GA. Timber and southern rough. Minimal fire behavior with smoldering, creeping and backing. Numerous structures threatened. Road, area and trail closures in effect. Scattered precipitation occurred over the fire area yesterday.

**Prada Drive**, Florida Forest Service. Ten miles south of Punta Gorda, FL. Southern rough. No new information.

**Predictive Services Discussion:** A warm, dry ridge of high pressure will lead to above normal temperatures and low afternoon humidities along and east of the Continental Divide from the Mexican border north to Canada. To the west, an upper level low pressure area will develop over the Pacific Northwest and will move into the Northern Rockies by afternoon bringing cooler temperatures and areas of rain to the mountains. In between these two systems, breezy winds are expected across the southern Great Basin and could lead to pockets of critical fire weather conditions. An intensifying cold front will move east from the Mississippi River valley and bring wetting precipitation to much of the east by afternoon. In Alaska, isolated storms will be possible along the border with the Yukon Territory in the afternoon as the high pressure ridge continues to migrate to the west to be over the Bering Strait by afternoon.

# LEAD Time

## Bias for Action

*Leadership Category*

Leaders in the wildland fire service are not only empowered but also duty-bound to act on a situation that is within our power to affect, even without direction from above.

This empowerment is not intended to encourage freelancing. In a high-risk environment, freelancing is a dangerous and unpredictable element, causing more harm than good. Ultimately, leaders are always accountable for their actions.

- A bias for action acknowledges wildfire as an environment where events do not always go according to plan,
- At times during an incident, one person may be the only one in a position to see what needs to be done and to make it happen,
- Time may not permit gathering all of the information that one might like to have, if you wait until you have all the facts to be 100% sure it will almost always be too late.

In these time critical situations, fire leaders use judgment, act within the intent of their leaders, work in unison with others, develop and communicate a plan, and then inform leaders of actions as soon as safely possible.

On a chaotic and rapidly developing wildfire, one person taking the initiative can make all the difference in seizing and taking advantage of an opportunity. Being hesitant, risk-averse, or indecisive can expose firefighters to greater long-term risks and translate into a waste of time, opportunity, energy, and money.

### Discussion Points

- Discuss the difference between freelancing and a bias for action.
- Describe and Discuss instances of taking appropriate action and indecisiveness / non-action.
- How are some ways we train for situations requiring a bias for action?
