

National Interagency Coordination Center
Incident Management Situation Report
Tuesday, June 6th, 2017 – 0530 MT
National Preparedness Level 2

National Fire Activity

Initial attack activity:	Light (183 new fires)
New large incidents:	11
Large fires contained:	4
Uncontained large fires:**	4
Area Command Teams Committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	0

**Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 2)

New fires:	2
New large incidents:	1
Uncontained large fires:	1
Type 1 IMTs committed:	1
NIMOs committed:	1

West Mims, Okefenokee National Wildlife Refuge. Unified command between Florida IMT 1 (Leneave) and NIMO (Quesinberry). Sixteen miles southeast of Fargo, GA. Timber and southern rough. Minimal fire behavior with smoldering and creeping. Numerous structures threatened. Road, area and trail closures in effect.

* **Nelaka**, Avon Park Air Force Base, DOD. Ten miles south of Frostproof, FL. Southern rough. Minimal fire behavior with creeping and short-range spotting.

Alaska Area (PL 2)

New Fires:	13
New large incidents:	6
Uncontained large fires:	1

* **Kenakuchuk Creek**, Southwest Area Forestry, Alaska DOF. Twenty-three miles northwest of Aleknagik, AK. Short grass and hardwood litter. Minimal fire behavior with backing and torching. Last report unless significant activity occurs.

* **Pitka Fork**, Southwest Area Forestry, Alaska DOF. Eight miles southwest of Farewell, AK. Short grass and hardwood litter. Moderate fire behavior with creeping and running. Last report unless significant activity occurs.

* **Little Yetna River**, Southwest Area Forestry, Alaska, DOF. Twenty-eight miles northeast of Shageluk, AK. Short grass and hardwood litter. Active fire behavior with creeping and torching. Last report unless significant activity occurs.

* **American Creek**, Southwest Area Forestry, Alaska DOF. Nine miles southwest of Ophir, AK. Short grass and hardwood litter. Active fire behavior with torching and spotting. Last report unless significant activity occurs.

North Robertson, Tok Area Forestry, Alaska DOF. Twenty-eight miles northwest of Tok, AK. Timber. Minimal fire behavior with creeping and smoldering. Structures threatened.

* **Bell Creek**, Southwest Area Forestry, Alaska DOF. Three miles northwest of Crooked Creek, AK. Timber and hardwood litter. Extreme fire behavior with crowning, running and torching. Last report unless significant activity occurs.

* **Tubungaluk Creek**, Southwest Area Forestry, Alaska DOF. Twenty-seven miles northeast of Bethel, AK. Short grass, timber and tall grass. Moderate fire behavior with creeping and backing. Last report unless significant activity occurs.

Predictive Services Discussion: As a departing area of low pressure moves into southcentral Canada from Montana, it will push a cold front east into the Great Plains creating scattered showers and storms as far south as West Texas. To the west, a very warm and dry ridge of high pressure will build northward from Mexico into the Great Basin and eventually into the Pacific Northwest creating conditions that are much warmer and drier than normal. Looking east, a stalled cold frontal boundary will continue to produce widespread showers and storms along the Gulf Coast. The Great Lakes region will remain dry and breezy with temperatures slightly below normal while New England remains cool and wet. In Alaska, low pressure in the northern Gulf of Alaska will continue to push moisture into the Interior creating isolated storms once again in the afternoon.

DOWNHILL FIRELINE CONSTRUCTION CHECKLIST

Operational Engagement Category

Downhill fireline construction is hazardous in steep terrain, fast-burning fuels, or rapidly changing weather. Downhill fireline construction should not be attempted unless there is no tactical alternative. When building downhill fireline, the following is required:

- Crew supervisor(s) and fireline overhead will discuss assignments prior to committing crew(s). Responsible overhead individual (TFLD or ICT4 qualified or better) will stay with resources until the job is completed.
- Decision will be made after proposed fireline has been scouted by supervisor(s) of involved crew(s).
- LCES will be coordinated for all personnel involved.
 - Crew supervisor(s) is in direct contact with lookout who can see the fire.
 - Communication is established between all crews.
 - Ensure rapid access to safety zone(s) in case fire crosses below crew(s).
- Direct attack will be used whenever possible; if not possible, the fireline should be completed between anchor points before being fired out.
- Fireline will not lie in or adjacent to a chute or chimney.
- Starting point will be anchored for crew(s) building fireline down from the top.
- Bottom of the fire will be monitored; if the potential exists for the fire to spread, action will be taken to secure the fire edge.
- Can fire be carried with you?
