

National Interagency Coordination Center
Incident Management Situation Report
Wednesday, June 7th, 2017 0530 MT
National Preparedness Level 2

National Fire Activity

Initial attack activity:	Light (84 new fires)
New large incidents:	6
Large fires contained:	1
Uncontained large fires:**	6
Area Command Teams Committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	0

**Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 2)

New fires:	2
New large incidents:	0
Uncontained large fires:	0
Type 1 IMTs committed:	1
NIMOs committed:	1

West Mims, Okefenokee National Wildlife Refuge. Unified command between Florida IMT 1 (Leneave) and NIMO (Quesinberry). Sixteen miles southeast of Fargo, GA. Timber and southern rough. Minimal fire behavior with smoldering. Numerous structures threatened. Road, area and trail closures in effect. Precipitation occurred over the fire are yesterday.

Nelaka, Avon Park Air Force Base, DOD. Ten miles south of Frostproof, FL. Southern rough. No new information.

Southwest Area (PL 3)

New fires: 9
 New large incidents: 1
 Uncontained large fires: 1

Slim, Apache-Sitgreaves NF. Sixteen miles west of Heber, AZ. Timber and closed timber litter. Active fire behavior with uphill runs, flanking and backing. Road closures in effect.

* **Corral**, Gila NF. Twenty-three miles northwest of Mimbres, NM. Tall grass and timber. Minimal fire behavior with creeping and smoldering. Last report unless significant activity occurs.

Alaska Area (PL 2)

New Fires: 3
 New large incidents: 3
 Uncontained large fires: 2

American Creek, Southwest Area Forestry, Alaska DOF. Nine miles southwest of Ophir, AK. Short grass and hardwood litter. Extreme fire behavior with crowning, torching and spotting. Last report unless significant activity occurs.

Pitka Fork, Southwest Area Forestry, Alaska DOF. Eight miles southwest of Farewell, AK. Short grass and hardwood litter. Extreme fire behavior with torching and spotting. Last report unless significant activity occurs.

North Robertson, Tok Area Forestry, Alaska DOF. Twenty-eight miles northwest of Tok, AK. Timber. Minimal fire behavior with group torching, creeping and smoldering. Structures threatened.

* **Pikmiktalik River**, Southwest Area Forestry, Alaska DOF. Twenty-five miles west of Tuluksak, AK. Tall grass and timber. Active fire behavior with creeping and backing. Last report unless significant activity occurs.

* **Deadmans Slough**, Alaska Fire Service, BLM. Two miles south of Anvik, AK. Timber. Moderate fire behavior with isolated torching and creeping.

* **Blair Lakes**, Alaska Fire Service, BLM. Fifteen miles southwest of Big Delta, AK. Timber. Minimal fire behavior with creeping and smoldering. Structures threatened. Last report unless significant activity occurs.

Predictive Services Discussion: High pressure will continue to intensify over the Intermountain West and will lead to very warm and dry conditions that extend from Montana south to the Mexican border. Scattered, mainly wet convection is expected along the eastern edge of the ridge across the western Plains, Colorado, and New Mexico. The Pacific Northwest could see some slight cooling as a strong system begins to move southeast from the Gulf of Alaska. High pressure will also bring warm and dry conditions to much of the east except along the Gulf of Mexico coastline where wet conditions will continue. Looking north to Alaska, warm and dry conditions will return to the interior as the ridge of high pressure begins to rebuild over the state.

Escape Routes 2 (LCES)

Operational Engagement Category

Escape Routes are the path the firefighter takes from their current locations, exposed to the danger, to an area free from danger. Notice that escape routes is used instead of escape route(s). Unlike the other components, there always must be more than one escape route available to the firefighter.

Escape routes are probably the most elusive component of LCES. Their effectiveness changes continuously. As the firefighter works along the fire perimeter, fatigue and spatial separation increases the time required to reach the safety zone.

The most common escape route (or part of an escape route) is the fireline. On indirect or parallel fireline, situations become compounded. Unless safety zones have been identified ahead, as well as behind, firefighters retreat may not be possible.

- Have you ever timed an escape route? If not how do you judge its effectiveness?
- Describe a time when you were uncomfortably distant from your escape route.
- Describe a method you have used to communicate an escape route to your crews.
