

National Interagency Coordination Center
Incident Management Situation Report
Friday, June 9th, 2017 – 0530 MT
National Preparedness Level 2

National Fire Activity

Initial attack activity:	Light (94 new fires)
New large incidents:	14
Large fires contained:	2
Uncontained large fires:**	12
Area Command Teams Committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	3

**Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 4)

New fires:	21
New large incidents:	4
Uncontained large fires:	5
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3

* **Lizard**, Coconino, NF. IMT 1 (Pierson). Three miles southeast of Dragoon, AZ. Short grass and brush. Active fire behavior with flanking, wind driven and uphill runs. Numerous structures threatened. Evacuations in effect.

* **Bowie**, Southeast District, Arizona DOF. IMT 2 (Sinclair). Thirteen miles southeast of Bowie, AZ. Brush and tall grass. Active fire behavior with wind driven runs, flanking and running. Structures threatened. Evacuations, area, road and trail closures in effect.

Boundary, Coconino, NF. IMT 2 (Andrews). Previously reported incident. Twelve miles north of Bellemont, AZ. Timber, short grass, heavy logging slash. Moderate fire behavior with short range spotting and group torching.

* **Freeze 2**, San Carlos Agency, BIA. IMT 2 (Bales). Twenty-seven miles southeast of Whitewater, AZ. Timber. Active fire behavior with uphill runs, isolated torching and spotting.

* **Paige Creek**, Coronado, NF. Seventeen miles northeast of Vail, AZ. Brush and short grass. Moderate fire behavior with flanking and creeping. Structures threatened.

Slim, Apache-Sitgreaves NF. Sixteen miles west of Heber, AZ. Timber and closed timber litter. Minimal fire behavior with backing. Road closures in effect.

Snake Ridge, Coconino, NF. Previously reported incident. Twenty miles southwest of Quemado, NM. Timber, brush and short grass. Minimal fire behavior. Structures threatened. Area closure in effect. Last report unless significant activity occurs.

Baca, Gila, NF. Previously reported incident. Ten miles south of Quemado, NM. Short grass and timber. Moderate fire behavior with single tree torching. Road and trail closures in effect. Last report unless significant activity occurs.

Bear, Coconino, NF. Previously reported incident. Ten miles southeast of Clint's Well, AZ. Timber. Minimal fire behavior. Last report unless significant activity occurs.

GID – Gila District, BLM

Alaska Area (PL 2)

New Fires:	5
New large incidents:	8
Uncontained large fires:	2

North Robertson, Tok Area Forestry, Alaska DOF. Twenty-eight miles northwest of Tok, AK. Timber. Minimal fire behavior with creeping and smoldering.

Deadmans Slough, Galena Zone, BLM. Two miles south of Anvik, AK. Timber. Moderate fire behavior with isolated torching and creeping.

* **South Fork Salcha**, Fairbanks Area Forestry, DOF. Twenty-two miles northeast of Big Delta, AK. Timber. Active fire behavior with group torching, uphill runs and short range spotting. Structures threatened. Last report unless significant activity occurs.

Little Yetna River, Southwest Area Forestry, Alaska, DOF. Previously reported incident. Twenty-eight miles northeast of Shageluk, AK. Short grass and hardwood litter. Active fire behavior with torching and creeping. Last report unless significant activity occurs.

American Creek, Southwest Area Forestry, Alaska DOF. Previously reported incident. Nine miles southwest of Ophir, AK. Short grass and hardwood litter. Active fire behavior with group torching and running. Last report unless significant activity occurs.

* **Ball Creek**, Southwest Area Forestry, Alaska DOF. Eight miles east of Flat, AK. Short grass and hardwood litter. Active fire behavior with torching and spotting. Last report unless significant activity occurs.

* **River North**, Galena Zone, BLM. Thirty-one miles southeast of Shaktoolik, AK. Timber and short grass. Minimal fire behavior with single tree torching and creeping. Last report unless significant activity occurs.

* **Allen**, Galena Zone, BLM. Seven miles southwest of Golovin, AK. Timber. Minimal fire behavior with creeping and backing. Last report unless significant activity occurs.

* **Paiyun Creek**, Southwest Area Forestry, Alaska DOF. Thirty-eight miles southeast of Kwethluk, AK. Short grass. Moderate fire behavior with creeping. Last report unless significant activity occurs.

* **Coral Creek**, Southwest Area Forestry, Alaska, DOF. Thirty miles southeast of Kwethluk, AK. Short grass and brush. Active fire behavior with creeping and backing. Last report unless significant fire activity occurs.

* **North Fork**, Galena Zone, BLM. Thirty-five miles northeast of Unalakleet, AK. Brush. Minimal fire behavior with creeping. Last report unless significant activity occurs.

Predictive Services Discussion: A strong low pressure system moving east from the eastern Aleutian Islands will create a southerly flow across western portions of Alaska that will allow for cooler temperatures and scattered showers to develop by afternoon. Across the eastern interior, warm and dry conditions will continue under a strong ridge of high pressure. In the CONUS, a strong and cool low pressure system will begin to move onshore into the Pacific Northwest and will spread showers as far east as western Montana and Idaho where temperatures will be much cooler than previous days. Critical fire weather conditions are possible across portions of Central and Southern California and Nevada in the grasses as breezy winds and low humidities interact with the curing fine fuels. Warm and dry conditions will return to the Great Plains as the strong ridge of high pressure begins to migrate eastward.

Roadside Incident Response

Vehicles/Roads Category

Nationally, the number of injuries and fatalities among emergency responders who are responding to roadside incidents is increasing at an increasing rate. Although most wildland fires occur in remote areas, there are situations where wildland fire personnel are responding to fires along rural country roads, jeep roads, or major highways; the risk still exists for our firefighters. Below is a checklist of considerations that should be utilized when responding to fires and other incidents along roadsides:

● Considerations

- Firefighter and public safety will always be the number one priority.
- Utilize L.C.E.S. in all incident activities.
- Personal Protective Equipment will be used on all incidents.

● Upon Arrival at the Scene

Size up incident- see Incident Response Pocket Guide

- What has happened?
- What is happening?
- What will or could happen?
- Is this a HazMat situation?

● Risk Management Process-

- Decision Point, Go No Go. See the Incident Response Pocket Guide, page 1

● Tactical Considerations

- Anytime traffic flow is affected by the incident, contact the jurisdictional law enforcement agency for assistance.
- Conduct all operations as far from traffic lanes as possible to provide for crew and public safety.
- Park units on the same side of the roadway whenever possible to avoid traffic congestion.
- Personnel do not exit the fire apparatus until instructed to do so by the module leader.
- Exit the fire apparatus away from the roadway or where hazard exposure is minimized.
- Exit the fire apparatus with full personal protective equipment.
- Post a lookout to watch for and control oncoming traffic.
- Utilize forward and rear spotters when visibility is impaired or road conditions warrant.
- Utilize and place road flares or other traffic warning signs whenever possible
- If equipment needs to be removed from the traffic side of the apparatus, one person will retrieve the equipment and a lookout will watch for oncoming traffic.

- Engine operators will operate pumps from the non-traffic side or from the cab of the apparatus when possible. Keep all hose, fire tools, and equipment out of traffic lanes when possible.
- During night operations utilize reflective clothing, vests and other safety equipment as necessary.
- All emergency responses on roadways will be concluded as quickly as possible to reduce personnel exposure.
- Cancel or demob unnecessary apparatus as soon as possible.

• *** Each agency emergency vehicle operator will follow their particular state laws and agency policies governing the operations of emergency vehicles.*
