

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, June 10th, 2017 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (84 new fires)
New large incidents:	3
Large fires contained:	1
Uncontained large fires:**	14
Area Command Teams Committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	3

**Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 4)

New fires:	18
New large incidents:	0
Uncontained large fires:	5
Type 1 IMTs committed:	1
Type 2 IMTs committed:	3

Lizard, Coconino, NF. IMT 1 (Pierson). Three miles southeast of Dagoon, AZ. Short grass and brush. Active fire behavior with flanking, wind driven and uphill runs. Numerous residences threatened. Evacuations in effect.

Bowie, Southeast District, Arizona DOF. IMT 2 (Sinclair). Thirteen miles southeast of Bowie, AZ. Brush and tall grass. Minimal fire behavior with uphill runs, smoldering and creeping. Residences threatened.

Boundary, Coconino, NF. IMT 2 (Andrews). Twelve miles north of Bellemont, AZ. Timber, short grass, heavy logging slash. Moderate fire behavior with flanking and backing.

Paige Creek, Coronado, NF. Seventeen miles northeast of Vail, AZ. Brush and short grass. Active fire behavior with flanking and smoldering. Residences threatened.

Slim, Apache-Sitgreaves NF. Sixteen miles west of Heber, AZ. Timber and closed timber litter. Minimal fire behavior with smoldering. Road closures in effect. Reduction in acreage due to more accurate mapping.

Dove, San Carlos Agency, BIA. Previously reported incident. Thirty miles northeast of San Carlos, AZ. Hardwood litter and short grass. Minimal fire behavior. Last report unless significant activity occurs.

Freeze 2, San Carlos Agency, BIA. IMT 2 (Bales). Twenty-seven miles southeast of Whitewater, AZ. Timber. No new information.

Predictive Services Discussion: As an Aleutian Low Pressure system moves east toward southwestern Alaska, showers and gusty southerly winds will bring cooler conditions to the western half of the state. Across the eastern half of the state, expect a continuance of warm and dry conditions with isolated afternoon storms under a weakening ridge of high pressure. An unseasonably strong, cool, and wet system will move further inland into the Northern Rockies and Great Basin producing widespread wetting rainfall and some high elevation snow across the northwestern corner of the nation. Further south, critical fire weather conditions are expected near and west of the Four Corner s region as gusty southwesterly winds interact with low afternoon humidities. Across the Gulf Coast, scattered thunderstorms will bring additional moderate to heavy precipitation to Florida as afternoon sea breezes take advantage of lingering atmospheric moisture over the state.

WORKING WITH HELICOPTER DROPS

Aviation Category

Consider the following questions when you have a helicopter with a bucket working in your area:

If the helicopter is a Type 1 increase the distance of standby place from the drop zone.

Use helicopter drops to knock down or secure a fire area that poses a direct imminent threat to escaping control lines or climbing up ladder fuels.

- Do you have good communications?
- Does the pilot have a clear understanding of the target?
- Are trees and snags in the drop zone?
- Are ground crews clear of the area?
- What are the winds doing?
- What is the turnaround time for the helicopter?
- Are people on the ground aware of the effects of the helicopter's rotorwash?
- Give feedback to the pilot about drop accuracy. Be honest and constructive.
- Be aware that helicopter performance capabilities may be significantly reduced at high altitudes and/or high temperatures.
