

National Interagency Coordination Center
Incident Management Situation Report
Sunday, May 28th, 2017 0530 MT
National Preparedness Level 2

National Fire Activity

| | |
|-------------------------------|----------------------|
| Initial attack activity: | Light (53 new fires) |
| New large incidents: | 1 |
| Large fires contained: | 0 |
| Uncontained large fires:** | 3 |
| Area Command Teams Committed: | 0 |
| NIMOs committed: | 1 |
| Type 1 IMTs committed: | 2 |
| Type 2 IMTs committed: | 0 |

**Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 3)

| | |
|--------------------------|---|
| New fires: | 3 |
| New large incidents: | 0 |
| Uncontained large fires: | 0 |
| Type 1 IMTs Committed | 1 |

Pinal, Tonto NF. IMT 1 (Day). Six miles south of Globe, AZ. Timber and chaparral. Active fire behavior with uphill runs, wind driven runs and short-range spotting. Numerous structures threatened. Road and area closures in effect.

Snake Ridge, Coconino NF. Previously reported incident. Thirty-four miles southeast of Flagstaff, AZ. Timber, brush and short grass. Moderate fire behavior with isolated torching. Last report unless significant activity occurs.

| Incident Name | Unit | Size | | % | Ctn/ Comp | Est | Personnel | | Resources | | | Strc Lost | \$\$ CTD | Origin Own |

Predictive Services Discussion: Warm and dry conditions will continue over the West as a strong ridge of high pressure remains in place. Isolated storms will be possible along the mountain crests of the Pacific Northwest, Northern Rockies, and Great basin in the afternoon. The Sierras in northern California can also expect to see afternoon convection as well. While hot and dry conditions are expected across the desert southwest, the Great Plains will experience cool and breezy conditions in the wake of the previous day's front. Much of the East can expect to see shower and storm activity as a strong cold front begins to push east of the Mississippi River by afternoon. In Alaska, the same high pressure system located over the West will extend north through the state's interior producing warm and dry conditions. Coastal areas along the northern Gulf of Alaska coast will remain under a wet and cool pattern.

UNFAMILIAR WITH WEATHER AND LOCAL FACTORS INFLUENCING FIRE BEHAVIOR

Weather / Fire Behavior Category

- Ask questions of local experts! What kinds of questions would you ask?
- Does the operational period plan give you adequate weather and information? What kinds of weather forecasts can you get? What other weather or local information do you look for in the shift plan?
- Can you get information from resources that have been on the fire? What questions will you ask of the crew that you are replacing?
- Is there any other way to obtain information? List common sources of information on weather and local factors (Examples: Web based weather Activity Planner, Point Forecast Matrix, NOAA Internet Briefing)
- To reduce risks:
 - Base all actions on current and expected fire behavior.
 - Post lookouts.
 - Establish escape routes and safety zones.
 - Take extra caution! Discuss a fire where you relied on information from the local unit (perhaps where your fire knowledge and experience was very different from how they did things—southeast or Alaska).
 - Recognize and report visual indicators (clouds, WX obs., cold front passage, inversion breaking)
