

**National Interagency Coordination Center**  
**Incident Management Situation Report**  
**Sunday, October 1, 2017 – 0530 MT**  
**National Preparedness Level 3**

**National Fire Activity**

Initial attack activity:	Light (36) new fires
New large incidents:	1
Large fires contained:	1
Uncontained large fires:**	10
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	3
Type 2 IMTs committed:	9

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

**Northwest Area (PL 3)**

New fires:	3
New large incidents:	1
Uncontained large fires:	7
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

**Eagle Creek**, Columbia River Gorge National Scenic Area. IMT 2 (Harrod). One mile south of Cascade Locks, OR. Timber. Minimal fire behavior. Road, trail and area closures in effect.

**Chetco Bar**, Rogue River - Siskiyou NF. IMT 1 (Schulte). Sixteen miles west of Selma, OR. Timber and brush. Minimal fire behavior. Road, trail and area closures in effect.

**High Cascades Complex**, (2 fires), Rogue River - Siskiyou NF. IMT 2 (Johnson). Nine miles northeast of Prospect, OR. Timber. Minimal fire behavior. Road, trail and area closures in effect. Reduction in acreage due to more accurate mapping.

**Jones**, Willamette NF. Ten miles northeast of Lowell, OR. Timber and grass. Minimal fire behavior. Area closures in effect.

**Desolation**, Ochoco NF. Twenty miles northeast of Prineville, OR. Timber and brush. No new information. Last report unless new information is received.

\* **Whitehall**, Washington State Fire Marshall's Office. Fifteen miles southwest of Coulee, WA. Brush and tall grass. Active fire behavior with wind-driven runs. Residences threatened.

### Southern Area (PL 5)

New fires:	1
New large incidents:	0
Uncontained large fires:	0
Type 1 IMTs Committed:	1
Type 2 IMTs Committed:	6

**Hurricane Maria Puerto Rico**, Federal Emergency Management Agency (FEMA). IMT 1 (McGowan) has been tasked with establishment of an incident support base for the receipt and distribution of commodities, supplies and resources. IMT 2 (Zombro) is coordinating with other agencies to plan and prioritize emergency road clearing. FDNY IMT 2 (Kane) has been tasked with assessment of damage to critical infrastructure including roads, water systems and communications.

**Hurricane Maria U.S Virgin Islands**, Federal Emergency Management Agency (FEMA). IMT 2 (Bird) has mobilized to St. Croix and is managing a logistical staging area for incoming responders while preparing for FEMA operations. IMT 2 (Parrish) has mobilized to St. Thomas and is supporting the receiving and distribution of emergency commodities to aid in the relief efforts.

**Hurricane Harvey**, Texas A&M Forest Service. Texas IMT 2 (Hanneman) has mobilized to College Station, TX to support recovery and mitigation efforts, surveying impacts on local fire departments and distributing donated fire equipment.

**Hurricane Irma Recovery – South Florida Parks**, National Park Service. IMT 2 (Foust) is overseeing site assessment, debris cleanup and emergency stabilization within national parks in Florida, Georgia and South Carolina.

\*\*\* Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

\*\*\*Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

**Predictive Services Discussion:** Cool and wet conditions will continue across the northwestern states as the low pressure area continues to slowly move east along the Canadian border. Periods of valley rain and mountain snow are expected, especially across Montana. The dry, breezy westerly flow will continue across California and the Southwest. Pockets of critical fire weather conditions are expected near the Four Corners. Scattered showers and strong storms will be possible across the Great Plains. The East Coast will remain mostly warm and dry as high pressure lingers over the Tennessee River Valley. Areas of rain and storms will be possible across central and southern Florida as a low pressure area moves toward the west in to the Gulf of Mexico north of Cuba.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

## NFDRS PocketCards

*Weather/Fire Behavior Category*

The NFDRS PocketCard is a tool for field personnel to locally track outputs of the National Fire Danger Rating System (NFDRS) throughout the fire season. It is based on current and historical weather for a localized area and the area's historic fire occurrence. The PocketCard displays a general assessment of the fire potential and identifies combinations of local weather and fuel conditions that might contribute to severe fire behavior.

**The PocketCard provides:**

- A general indicator of the potential fire danger for a given rating or protection area.
- A graph showing the trend and status of the current year's fire season.
- A comparison of current year conditions to historical worst and average conditions.
- Fire danger values related to past large or problem fires.
- Critical local thresholds for temperature, humidity, wind speed, and fuel moistures associated with large or problem fires.

**Discuss the following ways to use the PocketCard:**

- Use it primarily before fires occur, before arriving to a fire. It is also useful during initial fire size-up, initial attack, and extended attack.
- Use it to learn of critical thresholds that predict the potential for extreme fire behavior for the local area. Be aware that local critical thresholds may be occurring earlier in the season.
- Use it to compare current and predicted local fire danger to historical local fire danger to enhance situational awareness.
- Use it to track daily fire danger indices that gauge the potential for weather and fuels to support extreme fire behavior and of the difficulty of control.
- Use it to supplement local experience.
- Use it as a point of reference for firefighters not familiar with the area represented by the card.
- When you receive a fire assignment outside your local area, visit the National PocketCard website at <http://fam.nwcg.gov/fam-web/pocketcards/default.htm> where PocketCards are filed by Geographic Area.
- Put it in the pocket of all your firefighters and keep one in your fire vehicle.
- Post it in dispatch. Use them in briefings. Provide them to incoming crews.
- **Do not use the PocketCard for site specific fire behavior predictions and fireline actions or without an interpretive briefing.**
- Review definitions and implications of ERC and BI values.
