

**National Interagency Coordination Center**  
**Incident Management Situation Report**  
**Monday, October 9, 2017 – 0530 MT**  
**National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (46) new fires
New large incidents:	0
Large fires contained:	0
Uncontained large fires:**	5
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	5

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

**Southern Area (PL 4)**

New fires:	4
New large incidents:	0
Uncontained large fires:	0
Type 1 IMTs Committed:	1
Type 2 IMTs Committed:	5

**Hurricane Maria Puerto Rico**, Federal Emergency Management Agency (FEMA). IMT 1 (McGowan) has been tasked with establishment of an incident support base for the receipt and distribution of commodities, supplies and resources. Transfer of command from IMT 2 (Zombro) back to the local unit will occur on 10/11. IMT is coordinating with other agencies to plan and prioritize emergency road clearing. FDNY IMT 2 (Kane) has been tasked with assessment of damage to critical infrastructure including roads, water systems and communications.

**Hurricane Maria U.S Virgin Islands**, Federal Emergency Management Agency (FEMA). IMT 2 (Bird) has mobilized to St. Croix and is managing a logistical staging area for incoming commodities.

**Hurricane Harvey**, Texas A&M Forest Service. Texas IMT 2 (Hanneman) has mobilized to College Station, TX to support recovery and mitigation efforts, surveying impacts on local fire departments and distributing donated fire equipment.

**Hurricane Irma Recovery – South Florida Parks**, National Park Service. Transfer of command from IMT 2 (Foust) back to the local unit will occur tomorrow. IMT is overseeing site assessment, debris cleanup and emergency stabilization within national parks and monuments in Florida, Georgia, South Carolina and Caribbean units.

#### Northwest Area (PL 2)

New fires:	5
New large incidents:	0
Uncontained large fires:	4

**Eagle Creek**, Columbia River Gorge National Scenic Area. One mile south of Cascade Locks, OR. Timber. Minimal fire behavior. Road, trail and area closures in effect.

**Chetco Bar**, Rogue River - Siskiyou NF. Sixteen miles west of Selma, OR. Timber and brush. Moderate fire behavior with backing and flanking.

**Jones**, Willamette NF. Ten miles northeast of Lowell, OR. Timber and grass. No new information. Last report unless new information is received.

**Teanaway River**, Southeast Region, Washington DNR. Six miles northeast of Cle Elum, WA. Timber. Minimal fire behavior.

Incident Name	Unit	Size		% Acres	Ctn/ Comp	Est	Personnel		Resources			Strc Lost	\$\$ CTD	Origin Own

\*\*\* Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

\*\*\*Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

**Predictive Services Discussion:** A thermal trough located along the Pacific Coast will keep temperatures slightly above normal west of the Sierra and Cascade Mountain crests. Cooler temperatures will prevail across the intermountain west as a disturbance begins to develop over Idaho and Montana. Scattered valley rain and mountain snow showers are expected near the center of the developing system. Elsewhere across the west, expect overall warm and dry conditions. In the East, the slow moving, wet cold front will continue to produce widespread showers and storms along the East Coast and across the Southeast.

## ATV Transport

Vehicles/Roads Category

### ATV Loading/Unloading

Loading/unloading of ATVs has resulted in serious injury and even death to employees. Only those who have been fully trained in ATV operations should conduct loading/unloading procedures. The following safety measures are recommended:

- Wear all PPE (including gloves, helmet, etc.) until ATV is either secured or unloaded
- Ensure header board (board placed in front of bed of truck or trailer) is in place and in good condition
- ATV tire ramps should be secure to trailer or tail gate and on level terrain
- If possible, use a tilt trailer to haul an ATV. If this is not feasible, try to lower back end of vehicle so slant of loading ramp is reduced. Back into ditch, hillside, or anything else to try and lower back end of vehicle
- When loading ATV onto vehicle or trailer, keep seated, and lean body weight forward on ATV.
- When unloading ATV, keep seated and keep weight forward. This helps keep ATV from flipping over backwards.
- Never load or unload an ATV with a load on the racks. Load all ATVs empty.

● **Drivers are responsible for their load—regardless who actually loads equipment. All drivers are responsible for:**

- Inspecting the ATV
- Recognizing overloads and poorly balanced weight
- Knowing the gear loaded on the ATV is securely tied down.

● **Securing ATV's:**

- Secure ATV in its normal operating position (on all four wheels)
- Set the parking brake and place transmission in gear
- Turn fuel valve OFF
- Use chock (that fits snugly against wheels) in front and back of ATV. Front end header boards should also block forward movement of ATV.
- Tie down ATV on at least each corner--use tie downs made from one inch nylon strap or greater, with hooks at each end and that have ratcheting buckles (ordinary rope should not be used due to stretching) or tie down straps that will lock in place
- ATVs should never be hauled with a load attached to the cargo racks. Hazard exists of losing the load from the ATV while in transit.
