

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, October 21, 2017 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Light (79) new fires
New large incidents:	1
Large fires contained:	2
Uncontained large fires:**	10
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

**Uncontained large fires include only fires being managed under a full suppression strategy.

Northern California Area (PL 3)

New fires:	15
New large incidents:	0
Uncontained large fires:	7
Type 1 IMTs Committed:	1

Central LNU Complex, Sonoma Lake Napa Unit, Cal Fire. Cal Fire IMT 1 (Gouvea). One mile north of Santa Rosa, CA. Brush and tall grass. Minimal fire behavior. Structures threatened. Evacuations, road and area closures are in effect. Reduction in acreage due to more accurate mapping.

Southern LNU Complex, (3 fires). Sonoma Lake Napa Unit, Cal Fire. One mile east of Napa, CA. Timber, brush and short grass. Minimal fire behavior. Residences threatened. Evacuations, road and area closures in effect.

Bear, San Mateo-Santa Cruz Unit, Cal Fire. Five miles northeast of Boulder Creek, CA. Timber. Minimal fire behavior. Road closures in effect.

Mendocino Lake Complex, (2 fires). Mendocino Unit, Cal Fire. One mile west of Potter Valley, CA. Timber, brush and grass. Minimal fire behavior. Precipitation occurred over the fire area yesterday.

*** **Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.**

***Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

Predictive Services Discussion: The breezy, westerly flow in place across the northwestern portion of the nation will get a reinforcing shot of moisture that will provide significant valley rain and high elevation snow areas along and west of the Continental Divide, mostly north of the California and Nevada state lines. Locations east of the Rocky Mountain Crest will likely experience down sloping winds that will inhibit rainfall production. Warm and dry conditions are expected across the Southwest and most of California, though the northwestern corner of the state could receive some wetting precipitation. Looking elsewhere, a passing front will move into the eastern portion of the Great Plains bringing showers and storms to the Mississippi River Valley. The East Coast will remain warm and dry under high pressure.

INSTRUCTIONS AND ASSIGNMENTS NOT CLEAR

Fire Communications Category

Every firefighter will be giving and receive briefings at some point on the job. Briefings are an effective way to disseminate information that can make the firefighter's job safer and easier. When giving a briefing, it is important to keep the following questions in mind and remain perceptive to how the audience is receiving the information:

- Did you use the Incident Response Pocket Guide standards briefing checklist?
- Did they ask questions? Talk about what it is like giving a briefing. Do you get empty stares? What feedback are you looking for to ensure they understand you?
- Did they take notes? What kind of information would you like to see people write down?
- Did they repeat information back? What other ways can you identify that your briefing is registering?
- Did you give all the necessary information? How will you ensure that you covered everything necessary?
 - Task
 - Location
 - Communications
 - Hazards
 - Who, when, etc.
- It is also important for the firefighter who is receiving instructions to be mindful of the following during the briefing:
 - Did you really listen? What do you do to make yourself pay attention to everything being said?
 - Did you understand the assignment, location, and the nature and location of hazards? Do you expect to figure it out for yourself when you get out there or do you step forward and ask questions?
- You must know the location of the assignment and:
 - What is to be done?
 - Who you are to report to and how often to report.
 - When you are expected to complete the assignment.
 - Hazards.
 - Communication plan frequencies.
 - Weather and fire behavior.
 - Status of adjoining forces.

Have an idea? Have feedback? Share it.
