

**National Interagency Coordination Center**  
**Incident Management Situation Report**  
**Sunday, October 22, 2017 – 0530 MT**  
**National Preparedness Level 3**

**National Fire Activity**

Initial attack activity:	Light (27) new fires
New large incidents:	0
Large fires contained:	1
Uncontained large fires:**	10
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

**Northern California Area (PL 3)**

New fires:	2
New large incidents:	0
Uncontained large fires:	7
Type 1 IMTs Committed:	1

**Central LNU Complex**, Sonoma Lake Napa Unit, Cal Fire. Cal Fire IMT 1 (Gouvea). One mile north of Santa Rosa, CA. Brush and tall grass. Minimal fire behavior. Road closures in effect.

**Southern LNU Complex**, (3 fires). Sonoma Lake Napa Unit, Cal Fire. One mile east of Napa, CA. Timber, brush and short grass. Minimal fire behavior. Residences threatened. Evacuations, road and area closures in effect.

**Bear**, San Mateo-Santa Cruz Unit, Cal Fire. Five miles northeast of Boulder Creek, CA. Timber. Minimal fire behavior. Road closures in effect.

**Mendocino Lake Complex**, (2 fires). Mendocino Unit, Cal Fire. One mile west of Potter Valley, CA. Timber, brush and grass. Minimal fire behavior. Precipitation occurred over the fire area yesterday.

\*\*\* Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

\*\*\*Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

**Predictive Services Discussion:** The breezy, westerly flow will continue across the northern tier of the country as the moist flow remains in place. While precipitation will be limited mainly to mountainous areas and to the Dakotas, humidity levels should be high enough to offset breezy conditions along the Rocky Mountain Front. Looking south, high pressure will keep warm and dry conditions in place across the Southwest, southern Great Basin, and California. Santa Ana winds will strengthen across Southern California making this an area of concern for the day. Looking east, a cold front will stall out just east of the Mississippi River and will provide a swath of shower and storm activity that stretches from Michigan south to Biloxi, Mississippi. The East Coast will remain warm and dry as the high pressure ridge begins to move off shore.

## EXTENDED ATTACK

*Operational Engagement Category*

After your initial size-up of the fire and/or transfer of command from an initial attack IC, answer the following questions. Repeat this analysis whenever there is a change, or predicted change, in fire conditions.

- Do you have a current fire weather forecast for the fire location?
- Is the observed fire weather consistent with the forecast?
- Have you established a new organizational structure and communicated it to the other forces associated with the fire?
- Can you control the fire with the resources available (either on the incident or soon to be on the incident) under expected conditions?
- Have you developed a plan to attack the fire?
  - Direct or indirect
  - Anchor points
  - Escape routes
  - Head or flank attack
  - Priority areas
- Have you communicated this to all personnel assigned to the incident, including new arrivals?
- Can you see all of the fire area?
- Can you communicate with everyone on the fire and with dispatch?
- Are escape routes established?
  - If you are using the black, is it completely burned and without a reburn potential?
- Are safety and the standard fire orders being followed and/or mitigated?
- Will you contain the fire before the next operational period?
- Have you reported the status of the fire to dispatch?
- Do you have a complete list of what resources have been ordered for the fire?
