

**National Interagency Coordination Center**  
**Incident Management Situation Report**  
**Friday, April 13, 2018 – 0800 MT**  
**National Preparedness Level 1**

**National Fire Activity**

Initial attack activity:	Light (545) new fires
New large incidents:	24
Large fires contained:	15
Uncontained large fires:**	15
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	0

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

**Southern Area (PL 2)**

New fires:	426
New large incidents:	14
Uncontained large fires:	10

\* **34 Complex**, Oklahoma DOF. Six miles north of Woodward, OK. Tall grass and brush. Extreme fire behavior with running, flanking and spotting. Numerous residences threatened. Road closures in effect.

**Spoonbill**, Big Cypress National Preserve, NPS. Thirty miles east of Naples, FL. Southern rough and tall grass. Minimal fire behavior with smoldering. Area closures in effect.

\* **Roadside**, Oklahoma DOF. Six miles southeast of Woodward, OK. Tall grass and brush. Active fire behavior with running and flanking. Residences threatened. Road closures in effect.

\* **Canadian River**, Texas A & M Forest Service. Started on private land seventeen miles north of Amarillo, TX. Tall grass. Extreme fire behavior with running. Structures threatened.

\* **Bower City**, Texas A & M Forest Service. Started on private land six miles south of Pampa, TX. Tall and short grass. Moderate fire behavior with wind driven runs, running and short-range spotting.

**Colony**, Concho Agency, BIA. One mile east of Colony, OK. Timber and tall grass. Minimal fire behavior.

\* **Buzzard**, Big Cypress National Preserve, NPS. Twenty-five miles northeast of Ochopee, FL. Southern rough, timber and tall grass. Active fire behavior with running, flanking and backing.

\* **Brake Road**, Oklahoma DOF. Eight miles northeast of Kilidare, OK. Tall grass and brush. Active fire behavior with flanking.

\* **Turkey Burn**, Texas A & M Forest Service. Started on private land seven miles northeast of Detroit, TX. Timber and hardwood litter. Minimal fire behavior with smoldering.

\* **Bull Pine**, Northeast Area, Oklahoma DOF. Four miles northeast of Peggs, OK. Hardwood litter and timber. Extreme fire behavior with wind driven runs and spotting.

**Greenway (11)**, Florida Forest Service. Sixteen miles southeast of Naples, FL. Southern rough. No new information.

\*\*\*Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

**Predictive Services Discussion:** Critical fire weather conditions are expected across portions of the Southwest and southern Great Plains as a strong cold front moves east from the Continental Divide into the Plains Friday into Saturday. The dry, gusty westerly flow will become cooler but will remain dry and breezy. On the north end of this system, snow is expected to fall from the Dakotas and Montana south into Nebraska. On the leading edge of this system, across the Southeast, a severe storm outbreak is possible as the front slowly pushes east through Sunday. Overall quieter conditions are expected across the nation on Monday; however, another strong system will begin making its presence known along the Pacific Northwest Coast as it prepares to move on shore and inland. Additional late season snowfall is expected Monday and Tuesday in the mountains across the northwestern portion of the nation. Overall quieter conditions are expected Wednesday and Thursday as the system moves northeast into Canada. However, another significantly critical fire weather pattern will redevelop over portions of Southern California Thursday as another low pressure system prepares to move on shore into southern parts of the state. Friday and Saturday appear to be critical days across the Southwest again as the system moves east. In Alaska, high pressure across the interior will keep temperatures near normal. Low pressure in the Bering Sea will create a breezy southerly flow along the West Coast and in

the Aleutians. Scattered showers will be possible across the Interior beginning mid-week as the ridge begins to move off to the southeast and as the breezy southerly flow along the coast moves inland. The best chances for precipitation will be across the western Interior.

## Serious Injury Procedures

*Firefighter Health & First Aid*

Dealing with serious injuries on the fireline can add even more stress to our hectic work environment. In the event a fireline accident occurs, adherence to the following principles is important to insure an adequate and appropriate response is made.

- Before entering the scene, determine whether it is safe to approach. Look for hazards as well as what may have happened. It may be necessary to move the patient or to make the area safe before doing an assessment.
- Provide first aid and assess the extent of the injuries.
- Make contact with your supervisor. Depending on the complexity of the fire, that could be your crew boss, the Division Supervisor, the IC, or even dispatch. If your fire has a medical plan, follow the plan.
- Provide them with accurate, concise information on the following
  - Number of people injured
  - Type of injuries
  - Severity of injuries (light, moderate, severe, life threatening)
  - Mechanism of injury
  - Vital signs (pulse, respirations, level of consciousness, etc)
- Determine the best method of evacuation. Depending on the severity of injury or availability of resources, this decision may already be made for you.
- Keep the radio frequency clear of non-emergency traffic, provide updates of the patient's condition and await instructions.
- If evacuation is by helicopter, it may be necessary to construct a helispot. Document treatment provided in case it is necessary to send the information along with the patient in the aircraft.
- If the patient needs to be carried to a road, insure enough people are available to work in relays.
- Once the patient is clear, take a moment to write down witness statements, clean up notes and timelines, and document any other pertinent information.
