

**National Interagency Coordination Center**  
**Incident Management Situation Report**  
**Monday, April 23, 2018 – 0800 MT**  
**National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (42) new fires
New large incidents:	4
Large fires contained:	5
Uncontained large fires:**	11
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

\*Nationally, there are 2 large fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

**Southern Area (PL 3)**

New fires:	24
New large incidents:	1
Uncontained large fires:	5
Type 1 IMTs committed:	1
Type 2 IMTs committed:	1

**Rhea**, Oklahoma DOF. Florida IMT 1 (Mousel). One mile west of Rhea, OK. Tall grass and brush. Minimal fire behavior with creeping and smoldering. Reduction in acreage due to more accurate mapping.

**34 Complex**, Oklahoma DOF. IMT 2 (Parrish). Six miles north of Woodward, OK. Tall grass and brush. Minimal fire behavior with smoldering. Numerous structures threatened.

**Rattlesnake Holler**, Northeast Area, Oklahoma DOF. Four miles southwest of Jay, OK. Timber. Minimal fire behavior with smoldering.

**Gate Mountain**, George Washington & Jefferson NF. Eight miles west of Timberville, VA. Hardwood litter and brush. No new information. Last report unless new information is received.

**Bar 2**, Osage Agency, BIA. One mile north of Blackburn, OK. Timber and brush. No new information. Last report unless new information is received.

### Southwest Area (PL 3)

New fires:	9
New large incidents:	0
Uncontained large fires:	3
Type 2 IMTs committed:	1

**Rattlesnake**, Fort Apache Agency, BIA. IMT 2 (Andrews). Twenty-four miles southwest of Alpine, AZ. Timber. Moderate fire behavior with backing and creeping. Road, area and trail closures in effect.

**Diener Canyon**, Cibola NF. Seven miles south of Blue Water, NM. Timber. Minimal fire behavior with backing, creeping and smoldering. Area closures in effect.

**Blue Water**, Cibola NF. Two miles south of Blue Water, NM. Timber. Minimal fire behavior with backing, creeping and smoldering. Structures threatened. Area closures in effect.

\*\*\* Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

\*\*\*Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

**Predictive Services Discussion:** The overall warming and drying trend will continue across the west as temperatures rise to be above average. One exception to this will be Montana, Idaho, and Wyoming where a passing cold front will produce a brief cooling of temperatures and a brief shot of shower activity. The Southwest will remain warm and very dry with slightly breezy winds expected in the afternoon. Showers with embedded storms will be possible across the Southeast. Coastal areas across Florida, Georgia, and South Carolina will see cooler and wet conditions as a cold front passes. In Alaska, high pressure over the Arctic Ocean will weaken as the low pressure area over the Bering Sea strengthens. The southwestern Interior will see an increase in rain and snow shower activity. Strong westerly flow will keep the Aleutians windy and areas across the south central portion of the state near Valdez and Cordova significantly wet.

## Unfamiliar With Weather And Local Factors

*Weather - Fire Behavior Category*

Ask questions of local experts! What kinds of questions would you ask?

Does the operational period plan give you adequate weather and information? What kinds of weather forecasts can you get? What other weather or local information do you look for in the shift plan?

Can you get information from resources that have been on the fire? What questions will you ask of the crew that you are replacing?

Is there any other way to obtain information? List common sources of information on weather and local factors. (Examples: Web based weather Activity Planner, Point Forecast Matrix, NOAA Internet Briefing)

### To reduce risks:

- Base all actions on current and expected fire behavior.
- Post lookouts.
- Establish escape routes and safety zones.
- Take extra caution! Discuss a fire where you relied on information from the local unit (perhaps where your fire knowledge and experience was very different from how they did things – southeast or Alaska).
- Recognize and report visual indicators (clouds, WX obs., cold front passage, inversion breaking).
