

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, August 9, 2018 – 0530 MT
National Preparedness Level 5**

National Fire Activity

Initial Attack Activity:	Light (122 fires)
New large incidents:	5
Large fires contained:	9
Uncontained large fires:**	56
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	12
Type 2 IMTs committed:	16

Nationally, there are 51 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

One hundred thirty-eight fireline management personnel from Australia and New Zealand are assigned to support large fires in the California and Northwest Areas.

Two MAFFS C-130 airtankers and support personnel from the 152nd Airlift Wing (Nevada Air National Guard), one from the 146th Airlift Wing (California Air National Guard) and one from the 302nd Airlift Wing (Colorado Springs, Air Force Reserve) have been deployed to McClellan Airfield, CA in support of wildland fire operations.

One RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 141st Air Refueling Wing (Washington Air National Guard) has been deployed to Spokane, WA in support of wildland fire operations in the West.

Northwest Area (PL 5)

New fires:	6
New large incidents:	0
Uncontained large fires:	17
Type 1 IMTs committed:	7
Type 2 IMTs committed:	3

Cougar Creek, Okanogan/Wenatchee NF. IMT 1 (Young). Twelve miles northwest of Ardenvoir, WA. Timber, medium logging slash and closed timber litter. Moderate fire behavior with uphill runs, flanking and backing. Numerous structures and energy infrastructure threatened. Evacuations, road, area and trail closures in effect.

Crescent Mountain, Okanogan/Wenatchee NF. IMT 1 (Dueitt). Eighteen miles west of Winthrop, WA. Timber. Moderate fire behavior with torching, flanking and running. Numerous residences threatened. Road, area and trail closures in effect.

Angel Springs, Northeast Region, Washington DNR. IMT 2 (Goldman). Eight miles northeast of Davenport, WA. Timber, brush and tall grass. Minimal fire behavior. Numerous residences threatened.

Miles, Umpqua NF. Unified Command between IMT 1 (Turman) and ODF IMT 1 (Hessel). IMT is also managing the Snow Shoe, Columbus and Round Top incidents. Five miles northeast of Trail, OR. Timber. Active fire behavior with running, spotting and torching. Numerous residence and energy infrastructure threatened. Evacuations, road, area and trail closures in effect.

Snow Shoe, Umpqua NF. Six miles northwest of Trail, OR. Timber. Moderate fire behavior with creeping and smoldering.

Columbus, Umpqua NF. Fifteen miles east of Tiller, OR. Timber. Moderate fire behavior with flanking, single-tree torching and group torching. Road and trail closures in effect.

Round Top, Rogue River-Siskiyou NF. Eight miles northeast of Prospect, OR. Timber. Moderate fire behavior.

Taylor Creek, Medford District, BLM. IMT 1 (Schulte). IMT is also managing the Klondike incident. Ten miles west of Grants Pass, OR. Timber and brush. Moderate fire behavior with uphill runs, isolated torching and short-range spotting. Numerous structures and communication infrastructure threatened. Road, area and trail closures in effect.

Klondike, Rogue River-Siskiyou NF. Nine miles northwest of Selma, OR. Timber and chaparral. Moderate fire behavior with backing, torching and isolated torching. Numerous residences threatened. Evacuations, road, area and trail closures in effect.

Miriam, Okanogan/Wenatchee NF. IMT 2 (Knerr). Fifteen miles east of Packwood, WA. Timber and brush. Active fire behavior with short crown runs, group torching and flanking. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

Natchez, Rogue River-Siskiyou NF. IMT 1 (Goicoechea). Fifteen miles southeast of Cave Junction, OR. Timber and chaparral. Active fire behavior with torching, spotting and uphill runs. Structures threatened. Evacuations, road, area and trail closures in effect.

Maple, Olympic NF. IMT 2 (Lawson). Ten miles north of Hoodspport, WA. Timber. Active fire behavior with uphill runs, group torching and flanking. Structures and communication infrastructure threatened. Road, area and trail closures in effect.

South Valley Road, the Dalles Unit, ODF. ODF IMT 1 (Cline). Seven miles southwest of Dufur, OR. Timber and grass. Minimal fire behavior. Numerous residences threatened.

Hendrix, Rogue River-Siskiyou NF. Nine miles southwest of Ashland, OR. Timber and medium logging slash. Minimal fire behavior. Residences threatened. Road, area and trail closures in effect.

Timber Crater 10, Crater Lake National Park, NPS. Twenty miles southwest of Chemult, OR. Timber. Minimal fire behavior. Area closures in effect.

Timber Crater 6, Crater Lake National Park, NPS. Twenty miles southwest of Chemult, OR. Timber. Minimal fire behavior. Area closures in effect.

Long Hollow 0806 RN, Prineville District, BLM. Started on private land five miles south of Dufur, OR. Brush and grass. Minimal fire behavior.

Silver Lake, Northeast Region, Washington DNR. Five miles west of Cheney, WA. Timber, light logging slash and short grass. Minimal fire behavior. Structures threatened.

Sheep Creek, Northeast Region, Washington DNR. Four miles northwest of Northport, WA. Timber. Moderate fire behavior with flanking, backing and smoldering. Residences and communication infrastructure threatened.

Predictive Services Discussion: Near record to record-setting heat is expected across the Great Basin and Northern Rockies, as the upper level ridge and surface thermal trough reach peak intensity. Very hot, dry, and unstable conditions will lead to a critical burning environment near existing fires. Winds will be generally light and diurnally driven. Moisture from a weakening tropical system west of Baja California will feed into the depleted monsoonal flow and reinvigorate it over the Four Corners region. Southern California could see a few afternoon storms. Winds along the West Coast from Oregon north into southwestern Canada will become breezy as a weakening low pressure area off shore begins to move toward the coast. In the East, near normal temperatures are expected, with mostly dry conditions, except across the Deep South where a stalled frontal boundary is expected to focus afternoon convection. North Texas could receive some additional beneficial precipitation.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

This Day in History is a brief summary of a powerful learning opportunity and is not intended to second guess or be judgmental of decisions and actions. Put yourself in the following situation as if you do not know what the outcome will be. What are the conditions? What are you thinking? What are YOU doing?

Sadler Fire

On August 5, 1999, a dry lightning storm passes through northern Nevada that ignites numerous fires. Due to a wet winter and spring, the fuels are abnormally heavy. Now, deep into summer, these fuels are measuring less than 80% live fuel moisture. Normal fire suppression tactics have not been effective on previous fires, particularly direct attack and burning operations during the heat of the day. The weather and fire behavior forecasts predict extreme burning conditions. The same day as the lightning storm, a Type 2 crew—the GNP3—is assembled in California. This crew consists of 21 members (17 FFT2s) from fuels and suppression modules as well as non-fire and overhead positions from various home units. The following day, they are dispatched to the Sadler Complex south of Elko, Nevada. During the next two days, they work on the fireline. The next day (Day 3), August 9, while conducting a burnout operation, six firefighters from the GNP3 crew are entrapped by wildfire.

0600 Briefing starts unannounced, several crews and overhead miss some and/or all of it. Briefing places little emphasis on a red flag warning that has been issued for high winds, low RH, and unstable atmospheric conditions. The IAP forecast calls for extreme fire behavior with high rates of spread, south winds increasing in afternoon, minimum RH 6-12%, Haines Index of 6, max temp 85-91, and FDFM of 3%. However, there are not enough IAPs for everyone—including the GNP3 crew boss and a DIVS. Extreme fire behavior is discussed at the GNP3 crew briefing and is characterized as “normal”.

0900 GNP3 is assigned to support 2 Interagency Hotshot Crews asked to burnout from Big Safety Zone to the NW and the dozer line to Black Safety Zone. The dozer line is about ½ mile north of the head of the fire.

1100 After a recon, the hotshot superintendents refuse to accept burnout assignment until the line south of Big Safety Zone is secure. The DIVS and the 2 IHCs leave to do the other burnout. GNP3 waits.

1300 GNP3 accepts assignment to burn out across the head of the fire from Black Safety Zone going east to the “Y”.

1400 Ignition is delayed due to unfavorable winds. Overhead feels if they “didn’t attempt a burn, the fire would get away”. Plan is changed to burnout from the east to the west instead—the very plan that the hotshots had refused.

1430 Due to concerns regarding GNP3 crew’s lack of experience and fitness, only 3 members and the crew boss are used for the firing operation.

1500 This squad begins firing from the “Y”—without an anchor point—supported by an engine. The fireline behind them is unsecured. Due to hills, no one on the burnout squad can see the main fire. There are no aircraft to assist as lookout. Because of occasional wind shifts, the igniters must walk very fast and occasionally trot to keep ahead of their fire. They are unable to use the black as a safety zone. For the current burning conditions, safety zones along the dozer line are too small and too far apart.

1515 Back behind the firing squad, the engine is very busy picking up multiple spot fires and ~~sloppovers~~. The engine

captain radios to stop ignition. There is no response. The same tactical channel is also being used by the other burnout and is overloaded with traffic.

1530 Half way through the 1.3 mile burnout, two more GNP3 members join the firing squad.

1540 Overhead watching the burnout see the main fire become visible and take off down the hill toward the squad. They attempt to warn the squad but are unable to make radio contact. Shortly after, the main fire becomes visible to the squad as it crests the ridge to the south. It is described as a “river of fire” as it makes a run at the dozer line and the crew at speeds in excess of 300 chains per hour with 15 ft. flame lengths.

The engine is cut off from the squad and retreats to a safety zone. The order to “run” is given to the firing squad. Tools and gear are dropped on the way to the safety zone, almost 600 ft. away. Several crewmembers unsuccessfully attempt to deploy their fire shelters.

Crew members receive 1st and 2nd degree burns and smoke inhalation. An injured crewmember, an EMT, suffering from smoke inhalation, is asked to provide first aid for the others.

Discussion:

- What are your responsibilities if you are asking another resource to take an assignment that has previously been turned down?
- The burnout was a potentially dangerous assignment. What will you do to size up your resource’s capabilities and experience and assign them to appropriate tasks?
- As a crew/crewmember, you have a responsibility to look after your own safety—which includes the right to accept or reject an assignment. Using the [IRPG](#) page 19, have everyone discuss how to properly refuse risk.
- Discuss how you and your crew would apply LCES throughout the day on this incident.
