Predictive Services Discussion: The previous day's cold front will push east into eastern Montana and North Dakota by late evening. Behind it, look for a breezy, dry westerly flow to develop. While temperatures will finally be close to normal, expect pockets of critical fire weather conditions due primarily to the effects of the wind. Near normal temperatures will be felt as far south as Northern California and the northern Great Basin. Further south, the monsoon will produce scattered wet and dry storms across the Four Corners. The upper Midwest will remain warm and dry under a weak ridge of high pressure, while New England will remain dry though cooler, thanks to a weak trough centered over the region. In the South, scattered storms are possible across Louisiana, Arkansas and Florida, as a stationary front remains parked just off the Atlantic and Gulf Coasts. Florida can also expect to see scattered storms as the front stretches across the central portion of the peninsula.

Working Around Pack Stock

Miscellaneous Fireline Hazards

Fire crews often receive supplies transported by pack stock (horses and mules). While these animals provide fire crews a valuable service, they can cause injury to themselves and personnel, and severely damage food, gear, and fire equipment if not handled properly.

Much like adding aviation resources to a fire incident, having pack stock around is adding an additional hazard to the fire environment, increasing the difficulty in maintaining situational awareness. Fire personnel must be aware that human activity, aircraft, wildlife, and weather conditions can and will affect the behavior of the pack animals, often unpredictably.

- Avoid making any sudden or abrupt moves or making any loud or unusual noises around the stock. Be calm, relaxed, steady, and smooth around the animals at all times.
- When passing pack stock on the trail, know your escape routes at all times. Move off the trail before the stock passes. Calmly move to the **same** side, preferably the downhill side, with all of your gear. Be far enough off the trail that no one could get kicked, but close enough for the stock to see everyone. Talk to the packer and the stock as they approach and pass...this helps the stock know that you and your crew are not something to be afraid of.
- Packers, like all fire personnel, must maintain communications at all times. Ensure the communication plan is known to everyone. Individual forest and park units will have the specific safety-related guidelines identified for Packers in regards to required fire training, PPE, communications, etc.
- **Work around pack stock in the same manner you would work around many types of helicopters:**
 - ✓ Stay outside of the safety circle unless invited or escorted in
 - ✓ Only approach from the front
 - ✓ Never approach from the tail or walk around the tail
 - ✓ Don't run, wave arms, throw tarps or anything else
 - ✓ Put your gear where directed and in an orderly manner
 - ✓ Weigh everything. Weight and balance are important on mules and helicopters!
