

**National Interagency Coordination Center  
Incident Management Situation Report  
Wednesday, July 11, 2018 – 0530 MT  
National Preparedness Level 3**

**National Fire Activity**

Initial Attack Activity:	Light (167) new fires
New large incidents:	3
Large fires contained:	5
Uncontained large fires:**	33
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	5
Type 2 IMTs committed:	9

Nationally, there are 23 large fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

One MAFFS C-130 airtanker and support personnel from the 153rd Airlift Wing (Wyoming, Air National Guard) and one MAFFS C-130 airtanker and support personnel from the 152nd Airlift Wing (Nevada, Air National Guard) have been deployed to Colorado Springs, CO in support of wildland fire operations.

### **Rocky Mountain Area (PL 3)**

New fires:	32
New large incidents:	0
Uncontained large fires:	9
Type 1 IMTs committed:	1
Type 2 IMTs committed:	4

**Spring Creek**, Costilla County. IMT 2 (Greer) and IMT 2 (Esperance). Transfer of command from IMT 2 (Greer) to IMT 2 (Esperance) will occur tomorrow. Nine miles northeast of Fort Garland, CO. Timber, brush and tall grass. Moderate fire behavior with creeping, group torching and smoldering. Several communities, communications and railroad infrastructure threatened. Evacuations, road, area and trail closures in effect.

**Lake Christine**, Eagle County. IMT 2 (Almas). One mile northwest of Basalt, CO. Timber and brush. Moderate fire behavior with isolated torching, creeping and smoldering. Residences, energy and communication infrastructure threatened. Evacuations, road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

**Weston Pass**, Pike-San Isabel NF. IMT 1 (Pechota). Nine miles southwest of Fairplay, CO. Timber and brush. Minimal fire behavior with flanking, backing, and creeping. Numerous residences threatened. Evacuations have been lifted. Road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

**Fawn**, White River District Office, BLM. IMT 2 (Rabe). Thirty-four miles south of Meeker, CO. Timber. Minimal fire behavior. Structures threatened.

**Skunk Creek**, Little Snake Field Office, BLM. Ten miles southeast of Baggs, WY. Timber and brush. Minimal fire behavior with torching and creeping. Structures and communications infrastructure threatened. Evacuations have been lifted. Reduction in acreage due to more accurate mapping.

**Terek**, Wind River/Bighorn Basin District Office, BLM. Eleven miles northeast of Worland, WY. Brush and short grass. Minimal fire behavior with running. Structures, energy infrastructure and sage-grouse habitat threatened. Evacuations have been lifted. Road and area closures in effect.

**Badger Creek**, Medicine Bow-Routt NF. Two miles northwest of Mountain Home, WY. Timber. Moderate fire behavior with creeping, backing and single-tree torching. Numerous structures threatened. Area and trail closures in effect.

**416**, San Juan NF. Thirteen miles north of Durango, CO. Timber and brush. Minimal fire behavior. Road, area and trail closures in effect.

**Burro**, San Juan NF. Fourteen miles south of Rico, CO. Timber. Minimal fire behavior. Road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

**Tabeguache**, Grand Mesa, Uncompahgre and Gunnison NF. Thirty miles west of Montrose, CO. Timber. Minimal fire behavior. Precipitation occurred over the fire area yesterday.

**Predictive Services Discussion:** The broad, hot high pressure ridge over the southern two thirds of the country will allow for a very active monsoon to continue across the Four Corners Region, Wyoming, Nevada, and Southern California. In these areas, storms will be mostly wet. There is increasing concern that moisture will begin working its way north across the Sierras and allow for the development of widely scattered dry storms as far north as the Far East Side, north of Lassen Peak, in Northern California. While still very warm, temperatures along the northern Border with Canada will be closer to normal in the wake of the previous day's front which will be passing over the Great Lakes today bringing scattered storms. In Alaska, expect for breezy conditions to continue across the Interior as another cold front moves into the Northwestern Interior by afternoon. Isolated storms will be possible in the Brooks Range and along the Yukon Border.

# Hazard Mitigation Through Risk Management

*Operational Engagement*

"Risk Management doesn't get in the way of doing the mission – ***it is the way we do the mission.***" The Risk Management Process assists in ensuring that critical factors and risks of the fireline work environment are considered during decision making. Good risk management utilizes a five-step process:

- Step 1 – Situational Awareness:
  - Obtain information.
  - Scout the fire.
  - Identify hazards—those likely to result in a negative impact.
  - Consider all aspects of current and future situations.
  - Consider known historical problem areas. (Apply information from the Fire Danger Pocket Card.)
  - Recognize the need for action.
  - Demonstrate ongoing awareness of fire assignment status.
  - Note deviations.
  - Attempt to determine why discrepancies exist with information before proceeding.
- Step 2 – Hazard Assessment:
  - Assess hazards to determine risks (e.g., fire behavior, snags, unburned fuels, work/rest).
  - Use the Look Up, Down, and Around; and the Tactical Watch Outs (both located in the [Incident Response Pocket Guide](#)) to identify high-risk tactical hazards.
  - Assess the impact of each hazard in terms of potential loss, cost, and mission/operational degradation based on probability and severity (probability—how likely an event will occur; severity—consequences if the event occurs). Keep in mind that increased exposure time increases probability.
- Step 3 – Hazard Control:
  - Determine the best approach to mitigate or control the risk from the hazards assessed.
  - Establish controls (e.g., anchor point, LCES, utilize downhill checklist, limit exposure time).
  - As control measures are developed, reevaluate each risk until it is reduced to a level where benefits outweigh potential costs.
- Step 4 – Decision Point (decision to accept or not accept the risk(s) associated with an action):
  - Consider whether controls are in place for identified hazards, whether selected tactics are based on expected fire behavior and if instructions have been given and understood.
  - Make certain the decision is made at the appropriate level; if not, then elevate to a higher level.
  - Reject the action if the risk is unacceptable.
- Step 5 – Evaluation:
  - Ensure controls are implemented and accomplished to standards.
  - Supervise/evaluate effectiveness of controls and decisions. Stay on top of the situation and adjust risk controls as necessary.
  - Anticipate consequences of decisions; if controls do not work, determine problem and derive a better solution.
  - Adjust actions as the situation changes; maintain situational awareness at all times.
  - Maintain feedback line.
