

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, June 3, 2018 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial Attack Activity:	Light (40) new fires
New large incidents:	2
Large fires contained:	1
Uncontained large fires:**	8
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

Nationally, there are 2 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Predictive Services Discussion: Scattered wet convection will be possible across eastern portions of the Four Corners region as the lower levels of the atmosphere begin to moisten up in response to the previous day's convective activity and the continuance of convection from the overnight period. Scattered convection will also be possible across the northwestern portion of the country as a weak cold front moves east along the Canadian Border. A breezy, on shore flow is expected across Oregon and Northern California. Elsewhere, the Mid-Atlantic states and the Southeast will remain warm, muggy, and wet as low pressure off the coast of Delaware is reinforced by another weak but wet system approaching from West Virginia. In Alaska, overall warm and dry conditions are expected as a weak but large high pressure ridge over the Yukon Territory extends westward into the state. However, a few isolated storms will be possible across the interior will be possible as another, stronger low pressure area north of the Aleutian Islands begins to pump a little moisture in to the state by afternoon.

Escape Routes Take 5@2

Operational Engagement

Its 1400...you have been working all morning. How far away have your safety zones become? Safety zones are only good if you can reach them. How long will your escape route take? What is the condition of the crew? How long will it take your slowest member to get there? Are your expectations realistic?

Look at the times below...if your fire blew up right now, can you and every member of your crew make it to your safety zone?
