

**National Interagency Coordination Center
Incident Management Situation Report
Friday, June 8, 2018 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial Attack Activity:	Light (130) new fires
New large incidents:	5
Large fires contained:	2
Uncontained large fires:**	18
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	4
Type 2 IMTs committed:	1

Nationally, there are 11 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 3)

New fires:	8
New large incidents:	1
Uncontained large fires:	5
Type 1 IMTs committed:	2

* **Soldier Canyon**, Mescalero Agency, BIA. IMT 1 (Pierson) mobilizing. One mile northeast of Mescalero, NM. Timber, brush and medium logging slash. Extreme fire behavior with crowning and spotting. Residences threatened. Evacuations in effect.

Ute Park, Cimarron District, New Mexico State Forestry. IMT 1 (Day). One mile east of Ute Park, NM. Timber, brush and short grass. Minimal fire behavior with backing, creeping and smoldering. Numerous residences threatened. Evacuations, road, area and trail closures in effect. Reduction in acreage due to more accurate mapping.

Buzzard, Gila NF. Ten miles east of Reserve, NM. Timber. Moderate fire behavior with smoldering, backing and flanking. Structures threatened. Road, area and trail closures in effect.

377, Apache-Sitgreaves NF. Five miles northeast of Heber, AZ. Timber and tall grass. Minimal fire behavior. Residences threatened. Road closures in effect. Reduction in acreage due to more accurate mapping.

Sawmill, Navajo Region, BIA. Ten miles north of Ft. Defiance, AZ. Timber and brush. No new information.

New fires:	27
New large incidents:	3
Uncontained large fires:	1

Molybdenum Mountain, Southwest Area Forestry, Alaska DOF. Started on BLM land 18 miles north of Chuathbaluk, AK. Timber and short grass. Minimal fire behavior.

Tusikpak Lake, Galena Zone, Alaska Fire Service. Sixteen miles east of Point Hope, Alaska. Short grass. Moderate fire behavior. Structures threatened. Last report unless significant activity occurs.

* **Webber Creek**, Upper Yukon Zone, Alaska Fire Service. Started on NPS land 32 miles east of Circle Hot Springs, AK. Timber and short grass. Active fire behavior with creeping, torching and backing. Last report unless significant activity occurs.

* **Zitziana River**, Tanana Zone, Alaska Fire Service. Started on state land 15 miles south of Manley Hot Springs, AK. Timber, Active fire behavior with backing, running and torching. Last report unless significant activity occurs.

* **Kilolitna River**, Tanana Zone, Alaska Fire Service. 52 miles northwest of Rampart, AK. Timber. Moderate fire behavior with creeping and backing. Last report unless significant activity occurs.

Deniktaw Ridge, Galena Zone, Alaska Fire Service. Started on Doyan Regional Native Corporation land 20 miles southwest of Hughes, AK. Timber, hardwood litter and short grass. Minimal fire behavior. Structures threatened. Last report unless significant activity occurs.

Predictive Services Discussion: The broad ridge of high pressure over the central portion of the country will weaken slightly as a cold front passing through the Northern Rockies weakens but is eventually reinforced by another front approaching from Washington State. On the eastern edge of the ridge, another disturbance will pass and strengthen as it moves south into the Ohio River Valley. Expect scattered storms with both systems. In the Southwest, a slightly stronger surge of moisture will move further north in to New Mexico leading to widely scattered wet and dry storms in the afternoon. In Alaska, a strong and cold low pressure area in the Gulf of Alaska will continue to pump moist and unstable air into the state's southern Interior. Expect a continuance of isolated convection along the higher terrain. The central and northern Interior will remain mostly warm and dry under the influence of a weak high pressure ridge though isolated showers and storms will be possible across the western Interior as well.

Escape Routes 2

Operational Engagement Category

Escape Routes are the path the firefighter takes from their current locations – when exposed to danger – to an area free from danger. Notice that escape routes is used instead of escape route(s). Unlike the other components, there always must be more than one escape route available to the firefighter.

Escape routes are probably the most elusive component of LCES. Their effectiveness changes continuously. As the firefighter works along the fire perimeter, fatigue and spatial separation increases the time required to reach the safety zone.

The most common escape route (or part of an escape route) is the fireline. On an indirect or parallel fireline, situations become compounded. Unless safety zones have been identified ahead, as well as behind, firefighters retreat may not be possible.

- Have you ever timed an escape route? If not how do you judge its effectiveness?
- Describe a time when you were uncomfortably distant from your escape route.
- Describe a method you have used to communicate an escape route to your crews.
