

**National Interagency Coordination Center**  
**Incident Management Situation Report**  
**Saturday, June 9, 2018 – 0530 MT**  
**National Preparedness Level 2**

**National Fire Activity**

Initial Attack Activity:	Light (106) new fires
New large incidents:	10
Large fires contained:	4
Uncontained large fires:**	22
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	4
Type 2 IMTs committed:	2

Nationally, there are 13 large fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

## Alaska Area (PL 2)

New fires:	4
New large incidents:	6
Uncontained large fires:	3

**Molybdenum Mountain**, Southwest Area Forestry, Alaska DOF. Started on BLM land 18 miles north of Chuathbaluk, AK. Timber and short grass. Minimal fire behavior.

\* **Kako Creek**, Galena Zone, Alaska Fire Service. Twenty-four miles north of Russian Mission, AK. Timber and short grass. Minimal fire behavior.

\* **Reindeer Lake**, Southwest Area Forestry, Alaska DOF. Started on Doyan Regional Native Corporation land 20 miles east of Holy Cross, AK. Closed timber litter. Minimal fire behavior.

**Deniktaw Ridge**, Galena Zone, Alaska Fire Service. Started on Doyan Regional Native Corporation land 20 miles southwest of Hughes, AK. Timber, hardwood litter and short grass. Active fire behavior with running, torching and flanking. Structures threatened. Last report unless significant activity occurs.

\* **Bella Creek**, Southwest Area, Alaska DOF. Three miles northwest of Iditarod, AK. Timber. Active fire behavior. Last report unless significant activity occurs.

\* **Doestock Creek**, Southwest Area, Alaska DOF. Five miles south of Chuathbaluk, AK. Timber and short grass. Minimal fire behavior. Last report unless significant activity occurs.

\* **Our Creek**, Southwest Area, Alaska DOF. Sixty miles northeast of McGrath, AK. Timber. Minimal fire behavior. Last report unless significant activity occurs.

**Predictive Services Discussion:** A strong cold front will move across the Pacific Northwest into the northern Great Basin and Northern Rockies by afternoon. Showers and storms are expected with the front's passage. Across the Southwest, the stream of subtropical moisture from Mexico into the region will continue as scattered wet and dry convection continues along and east of the Arizona, New Mexico state line. Across the Great Plains and East, the strong ridge of high pressure will linger creating very hot and humid conditions. Best chances for convection will be along the Great Lakes and across the Mid-Atlantic States. In Alaska, high pressure will linger over the Interior of the state keeping temperatures slightly above normal. However, moisture trapped within the ridge will lead to widely scattered showers and storms in the afternoon and evening.

## ESCAPE ROUTES 3

*Operational Engagement Category*

A primary objective of every operational fire plan is to keep firefighters out of entrapment situations. However, firefighters must always be prepared to escape quickly to a safety zone or deployment area. Consider the following during discussion of escape from possible entrapment.

- Have a plan that includes trigger points!
  - **Trigger Point:** An observable event that triggers a pre-determined action.  
Example: Temperature reaches 98 Degrees and RH goes into single digits the crew will follow the established escape route to the safety zone.
- Reassess escape routes throughout the operational period.
  - Has access to escape routes become more difficult as the day progresses?
  - Do you have more than one escape route?
  - Are all escape routes clearly marked?
  - Are all firefighters familiar with the escape routes?
- During an escape, time will be short. Describe considerations you might make in this situation such as:
  - Maintain control of all critical equipment such as PPE and radio... jettison gear that will not aid in your escape!
  - Maintain contact with all other crewmembers!
- Describe your vision of a good safety zone. How is that different from a deployment area?
- You should always know the location of your escape routes leading to safety zones and deployment areas.
