

**National Interagency Coordination Center  
Incident Management Situation Report  
Monday, June 18, 2018 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial Attack Activity:	Light (76) new fires
New large incidents:	1
Large fires contained:	4
Uncontained large fires:**	13
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

Nationally, there are 28 large fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

New fires:	3
New large incidents:	0
Uncontained large fires:	4
Type 1 IMTs committed	1
Type 2 IMTs committed	1

**Badger Creek**, Medicine Bow-Routt NF. IMT 2 (Greer). Two miles northwest of Mountain Home, WY. Timber. Minimal fire behavior. Numerous structures and sage-grouse habitat threatened. Evacuations, road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

**416**, San Juan NF. IMT 1 (Pechota). IMT is also managing the Burro fire. Thirteen miles north of Durango, CO. Timber and brush. Minimal fire behavior. Numerous structures threatened. Evacuations, road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

**Burro**, San Juan NF. Fourteen miles south of Rico, CO. Timber. Minimal fire behavior. Road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

**Upper Mailbox**, Uncompahgre Field Office, BLM. Three miles northeast of Redvale, CO. Chaparral. Minimal fire behavior. Road closures in effect. Precipitation occurred over the fire area yesterday.

**Predictive Services Discussion:** The Pacific Northwest, Northern Rockies, northern Great Basin, and portions of Northern California will continue to experience numerous showers and wet storms today as a broad, upper level low pressure area, laden with moisture from the remnants of Hurricane Bud, remains parked over the region. Due to cloudcover and precipitation, temperatures will be approximately 10 degrees below average. Further south, critical fire weather conditions are expected across the southern tip of Nevada, northwestern Arizona, and southwestern Utah as breezy winds interact with low afternoon humidities. In the East, the high pressure ridge will flatten into a westerly flow as a stationary front moves east across the Great Lakes and New England. Heavy rainfall will continue to be possible across portions of central and eastern Texas and Arkansas as a plume of tropical moisture moves north from the Gulf. In Alaska, a warming southerly flow into the interior of the state will allow for some moisture to upslope onto eastern portions of the Brooks Range to produce a few storms in the afternoon and evening. Other locations across the state should remain dry with slightly below average temperatures.

## No Communication Link

*Fire Communication Category*

Watchout Situation #7 is a danger that must be mitigated by maintaining good communications while working on fires. Firefighters must constantly ask themselves the following questions as situations change on the fireline:

- Can communication(s) be established?
  - Talk about how communications are set up on fires, including the variables that have to be considered.
  - Review situations where communications were a problem and what was done to fix the problem.
  - Do you need a repeater setup or can an experienced firefighter act as a human repeater?
- Is the communication triangle complete?
  - Review the communication triangle, and where it comes up in the "10 Standard Fire Orders" and the "18 Watchout Situations."
  - Discuss ways that firefighters can maintain the communication triangle on the fireline.
- Reduce the risks
  - If the situation is complex, wait until communications are in place.
  - Talk about the fires where crews had to leave the line, didn't go out on the line, or something negative happened because communications were inadequate. Discuss what was done to establish communications.
  - Discuss possible scenarios in which communications could be disrupted, and possible solutions.
