

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, June 23, 2018 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial Attack Activity:	Light (103) new fires
New large incidents:	5
Large fires contained:	3
Uncontained large fires:**	14
NIMOs committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

Nationally, there are 31 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Predictive Services Discussion: High pressure along the Californian Coast will remain amplified all the way into British Columbia. The thermal trough along the West Coast will continue to make its presence felt across California and southwestern Oregon by promoting hot and dry conditions. To the east, a low pressure area over the Central Rockies will lead to continued scattered wet convection across Montana, the Dakotas, and Wyoming. Critical fire weather conditions will be possible across the central Great Basin as breezy west winds interact with less hot but still very dry air. In the East, scattered showers and storms are expected as a cold front moves east across the Mid-Atlantic States. In Alaska, high pressure across the Interior and low pressure along the West Coast will linger. Scattered storms will be possible across the northern Interior north of Fairbanks and also across the southwestern Interior south of McGrath.

Driving Safety

Vehicles/Roads Category

Driving is one of the most hazardous things we do because we literally perform the task hundreds of times in the course of our daily lives we tend to take it for granted. Based on recent accident trends, vehicle accidents are the source of more deaths and serious injuries to wildland firefighters than any other single cause.

- To be a safe driver you have to *want* to be one. Take a good hard look at your driving habits. Are you training yourself to do the right things the right way, like fastening your seat belt, checking your mirrors, and maintaining safe following distances?
 - Inattentiveness is a major contributing factor in motor vehicle accidents within the wildland firefighting community. Since the average adult attention span is 15-20 minutes we must develop techniques that allow us to refocus our attention on our driving.
 - Many things can lure our attention away from our driving such as: fatigue, eating and drinking, reading directions and maps, writing, cell phone and radio use, conversation within the vehicle and music.
-
- ✓ Drive only when you are well rested and alert and avoid driving during the hours of 10:00 PM and 6:00 AM. Take a 10 to 15 minute break after every 2 hours.
 - ✓ Practice situational awareness; be aware of what is happening in front, behind, and on both sides of your vehicle.
 - ✓ Never drive when taking medications that make you drowsy.
 - ✓ Delegate navigation and communication to a passenger or pull over.
 - ✓ By constantly moving your vision, checking mirrors and distant road conditions, you can avoid highway hypnosis and daydreaming.
 - ✓ Avoid eating or drinking while driving.
 - ✓ When talking with passengers, keep your eyes on the road and both hands on the steering wheel. Avoid serious or argumentative conversations.
 - ✓ Switch off driving with others if multiple people are in the vehicle.
 - ✓ Do not be in a hurry, be patient.
-
- Safe driving starts with a safe vehicle. Something as simple as under-inflated tires can have serious consequences. Before operating any vehicle, do a walk-around to look for potential problems, make sure the lights and blinkers work, and adjust your seat and mirrors. If it is the first time you have driven the vehicle, make yourself aware of where everything is.
