

National Interagency Coordination Center
Incident Management Situation Report
Friday, March 30, 2018 – 0800 MT
National Preparedness Level 1

National Fire Activity

Initial attack activity:	Light (610) new fires
New large incidents:	38
Large fires contained:	38
Uncontained large fires:**	18
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

**Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

On March 23rd a firefighter passed away from injuries sustained while assigned to a wildfire near Ellinger, TX. The firefighting community extends condolences to family and friends of the deceased.

Active Incident Resource Summary

Total	59	134,838	9	149	8	876

Southern Area (PL 2)

New fires:	471
New large incidents:	35
Uncontained large fires:	18

* **Greenway (11)**, Florida Forest Service. Sixteen miles southeast of Naples, FL. Southern rough. Moderate fire behavior.

* **Firebreak 56 (23)**, Florida Forest Service. Eight miles east of Mexico Beach, FL. Southern rough. Extreme fire behavior.

* **Drumb**, Osage Agency, BIA. Two miles south of Wynona, OK. Grass. Extreme fire behavior with spotting and torching. Residences threatened.

W Boundary Rd (26), Florida Forest Service. Seventeen miles southeast of Immokalee, FL. Southern rough. Minimal fire behavior.

* **Walker**, Concho Agency, BIA. Nine miles southeast of Hominy OK. Grass and timber. Minimal fire behavior. Structures threatened.

* **Why**, Osage Agency, BIA. Two miles north of Avant, OK. Grass and timber. Minimal fire behavior. Residences threatened.

* **Tall Pine 2 (06)**, Florida Forest Service. Two miles northeast of Tamiami, FL. Southern rough. Moderate fire behavior. Structures threatened.

* **Context**, Everglades NP. Three miles northwest of Homestead, FL. Tall grass. Moderate fire behavior with backing and smoldering.

* **Old Blade Line (53)**, Florida Forest Service. Ten miles southeast of Lake Wales, FL. Southern rough. Minimal fire behavior.

* **Fobb Creek**, Southeast Area, Oklahoma DOF. Five miles northeast of Daisy, OK. Timber. Minimal fire behavior with smoldering.

* **County Line**, Northeast Area, Oklahoma DOF. Eleven miles east of Tahlequah, OK. Timber and short grass. Minimal fire behavior.

* **Pioneer Trail (64)**, Florida Forest Service. One miles east of Glencoe, FL. Southern Rough. Moderate fire behavior. Structures threatened.

* **Hairpin**, East Central Area, Oklahoma DOF. Twelve miles northeast of Clayton, OK. Timber. Minimal fire behavior with creeping and backing.

* **Windy Lane**, Southeast Area, Oklahoma DOF. Six miles south of Atoka, OK. Timber. Minimal fire behavior with smoldering.

Circle K, Oklahoma DOF. Five miles northwest of Skiatook, OK. Tall grass and brush. No new information. Last report unless new information is received.

Colorado Street, Texas A & M Forest Service. Started on private land three miles southwest of Monahans, TX. Short grass. No new information. Last report unless new information is received.

Joint, Northeast Area, Oklahoma DOF. Seventeen miles south of Tahlequah, OK. Hardwood litter and medium logging slash. No new information. Last report unless new information is received.

Al Petty Complex, Northeast Area, Oklahoma, DOF. Ten miles east of Colcord, OK. Hardwood litter. No new information. Last report unless new information is received.

*** Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

Predictive Services Discussion: The forecast period begins with a very broad but weak upper level trough in place over much of the nation except along the West Coast where a weak ridge of high pressure is positioned over California. A cold front moving southeast through the trough is bringing areas of snow and rain to the northern Plains and Great Lakes regions. By Saturday night, the fast-moving front will pass through New England and then exit into the Atlantic Ocean. Expect a gradual weakening of the overall pattern on Sunday and Monday as the ridge in the west is undercut by a pair of weak low pressure troughs moving across Baja California. Showers will be on the increase early Tuesday across the Pacific Northwest and the Northern Rockies as another system moves into the mountains producing some late season snowfall. Significant snowfall is possible across the Northern Great Plains Thursday and Thursday night as the system over the Northern Rockies begins to move east from the Continental Divide. In Alaska, high pressure centered over the Bering Sea north of Adak Island will strengthen through the weekend and will influence the weather across the western Interior with dry conditions and seasonal temperatures under a northerly flow. To the north, in the vicinity of the Brooks Range, snow will be possible as a front moves east from Siberia along the Arctic Coast. Despite its origins, this front is not particularly cold. The dry, northerly flow will continue over the state through

Tuesday. A pattern shift will begin mid-week as a low pressure area develops from the remnants of the front over ANWR and begins to move southwest into the central interior near Tanana by early Thursday. Southerly flow on the backside of the low will pull moisture over the Chugach mountains into the south central Interior bringing another round of snow for Thursday afternoon and night.

Unexploded Ordnance

Miscellaneous Fireline Hazards

Recognizing unexploded ordnance (UXO) is the first and most important step in reducing the risk of injury or death. UXO poses risk of injury or death to anyone in the vicinity. Safety measures include:

- If you see UXO, stop. Do not move closer.
- Never remove anything near UXO.
- Clearly mark the UXO area with flagging, etc.
- Keep a minimum of 500 feet away from any UXO that is on fire.
- Report discovery of UXO to your immediate supervisor and/or dispatch.
- The following types of UXO may be encountered on military, former military and non-military sites:
 - Small arms munitions
 - Guided missiles
 - Rifle grenades
 - Rockets
 - Projectiles
 - Mortars
 - Bombs
 - Hand grenades
 - Projected grenades
 - Dynamite
- UXO may be found fully intact or in fragments. All UXO, whether intact or in fragments, presents a potential hazard.
- Deteriorated UXO presents a particular hazard because it may contain chemical agents that become exposed.
