

National Interagency Coordination Center
Incident Management Situation Report
Saturday, May 5, 2018 – 0800 MT
National Preparedness Level 2

National Fire Activity

Initial attack activity:	Light (147) new fires
New large incidents:	5
Large fires contained:	2
Uncontained large fires:**	12
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	1

Nationally, there are 2 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 3)

New fires:	63
New large incidents:	4
Uncontained large fires:	7
Type 1 IMTs committed:	1
Type 2 IMTs committed:	1

McDannald, Texas A&M Forest Service. IMT 1 (Dueitt). Started on private land 21 miles west of Ft. Davis, TX. Tall grass. Moderate fire behavior with isolated torching and backing. Numerous residences threatened. Area closures in effect.

Avian Complex, Big Cypress National Preserve, NPS. IMT 2 (Parrish). Fifteen miles northeast of Everglades City, FL. Southern rough and tall grass. Active fire behavior with running, flanking and backing. Residences threatened. Area and trail closures in effect.

Simmons Ranch, Texas A&M Forest Service. Started on private land five miles north of Memphis, TX. Brush and tall grass. Moderate fire behavior with running.

* **Tye River**, George Washington & Jefferson NF. One mile southeast of Vesuvius, VA. Hardwood litter and brush. Active fire behavior with uphill runs, torching and short-range spotting. Residences threatened. Road and trail closures in effect.

Little Shepherds Trail, Kentucky DOF. Two miles north of Cumberland, KY. Hardwood litter and timber. Moderate fire behavior with uphill and wind driven runs.

* **Belfast Keller Rd**, Georgia Forestry Commission. Five miles southwest of Richmond Hill, GA. Southern rough and brush. Active fire behavior with running and group torching. Structures threatened.

* **Tressel**, Kentucky Private Lands. Three miles southeast of Kite, KY. Hardwood litter and light logging slash. Active fire behavior with uphill runs, wind driven runs and flanking.

* **Brushy**, George Washington & Jefferson NF. Five miles northwest of Bland, VA. Hardwood litter and closed timber litter. Active fire behavior with uphill runs, running and torching. Residences threatened. Road, area and trail closures in effect.

*** Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

Predictive Services Discussion: High pressure will remain in charge of the weather over the West as temperatures continue to warm to be 15 degrees or so above normal. A back door cold front will produce scattered showers across the northern Great Plains while a cold front moves into the east bringing scattered showers and storms. The Gulf Coast States will remain dry and warm under the influence of high pressure centered over the Gulf of Mexico. In Alaska, most of the Interior will be dry and cool under the influence of a weak high pressure ridge. However, the approaching and weakening area of low pressure from the Bering Sea will continue to produce precipitation across the southwestern Interior and along the northern Gulf Coast.

The 10 Standard Fire Orders

Operational Engagement Category

The orders are arranged according to their importance and grouped in logical sequence. Review and consider Standard Fire Orders as a part of every shift.

- Did you receive or request adequate weather briefing, current and predicted fire behavior, wind direction, predicted humidity, fuel moisture, and/or local factors?
- Do you have a map of the fire? Is topography, type of fuels, and direction of the spread defined?
- The Fire Behavior group deals with what the firefighter will encounter - weather, fire status, and fire behavior.
 1. Keep informed on fire weather conditions and forecasts.
 2. Know what your fire is doing at all times.
 3. Base all actions on current and expected behavior of the fire.
- Are you familiar with direction, distance, location, size of escape routes, and safety zones?
- Discuss the need for a lookout, such as extreme fire behavior, and fire located out of line-of-sight.
- Discuss importance of situational awareness.
- The Fireline Safety group emphasizes personal safety.
 4. Identify escape routes and safety zones, and make them known.
 5. Post lookouts when there is possible danger.
 6. Be alert. Keep calm. Think clearly. Act decisively.
- Review importance and means of passing tactical decisions and resource movement.
- Review other factors influencing potential changes in tactics, which could affect control of your forces.
- The Organizational Control group is centered around tactical decisions.
 7. Maintain prompt communications with your forces, your supervisor and adjoining forces.
 8. Give clear instructions and insure they are understood.
 9. Maintain control of your forces at all time.
- After you have considered, discussed and acted on the previous nine orders:
 10. Fight fire aggressively, having provided for safety first
