

National Interagency Coordination Center
Incident Management Situation Report
Tuesday, October 16, 2018 – 0800 MT
National Preparedness Level 1

National Fire Activity (Oct. 12 – Oct. 15)

Initial Attack Activity:	Light (160) new fires
New large incidents:	1
Large fires contained:	1
Uncontained large fires:**	5
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	3
Type 2 IMTs committed:	2

**Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

In support of Hurricane Florence, NIMO (Houseman) has mobilized to New Bern, NC.

In support of Hurricane Michael, IMT 1 (Dueitt) and IMT 2 (Goff) are mobilizing to Florida.

Active Incident Resource Summary

Northwest Area (PL 1)

New fires:	12
New large incidents:	1
Uncontained large fires:	3
Type 2 IMTs committed:	1

Klondike, Rogue River-Siskiyou NF. Transfer of command from IMT 2 (Harrod) to IMT 2 (Knerr) occurred on 10/14. Nine miles northwest of Selma, OR. Timber and brush. Active fire behavior with uphill runs, torching and spotting. Structures threatened. Evacuations, road, area and trail closures in effect.

* **Stukel**, Lakeview District, BLM. Eleven miles southeast of Klamath Falls, OR. Brush and tall grass. Moderate fire behavior with smoldering, creeping and torching. Structures and communication infrastructure threatened. Road and area closures in effect.

Cougar Creek, Okanogan-Wenatchee NF. Twelve miles northwest of Ardenoir, WA. Timber, brush and short grass. No new information.

*** Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

Predictive Service Discussion: A strong upper level trough over the upper Midwest will lead to breezy and colder than average conditions across the region and the Northeast. A warming trend will ensue across the northwestern states as high pressure builds inland from the coast and begins to intensify. To the south, low pressure over the Four Corners will induce a northeasterly flow over southern California which will allow for the Santa Ana wind event to continue for another day. Across the southern tier of the country, mostly dry conditions are expected as the Bermuda high extends west across Florida.

Hazardous Materials Encounters

Miscellaneous Fireline Hazards

Employees who may encounter hazardous materials in the field should be trained, as mandated by OSHA 1910.120 (q), First Responder Awareness Level. However, employees should always recognize that hazmat encounters require special precautions.

- Hazardous materials in the field include, but are not limited to:
 - Clandestine drug waste – waste as a result of “meth” labs, etc., which may look like common household trash at first glance. Drug lab waste can be identified by the presence of gallon plastic jugs, large plastic bags, 5-gallon buckets, and laboratory equipment (tubes and beakers).
 - Midnight dumping – may be recognized by the presence of barrels or other containers, discoloration of land, plants, or water, and/or dead vegetation and animals.
 - Transportation accidents – truck, rail, or pipeline accidents may result in the spillage or release of hazardous materials that may result in danger to life, property, or resources.
- In all instances, self-protection is your primary responsibility.
- Respond to all encounters by implementing the Three Rs:
 - **Recognize:** Attempt to identify the substance using the North American Emergency Response Guide, occupancy/location, placards/labels, container shapes/colors, and/or MSDS shipping papers.
 - **Retreat:** Move upwind, upgrade, or upstream; isolate the material; and deny entry to the site. Guidelines for isolation distances include: 150 feet for a minor incident (1 drum, 1 bag, etc.); 500 feet for a major incident (more than 1 drum, etc.); 300 feet for a residential and light commercial incident; 1,000 feet for an open area; 2,500 feet for an incident with BLEVE potential; 2,500 feet for the staging area (must be upwind with vehicles in a headed-out position).
 - **Report:** Notify your supervisor and agency dispatcher. Request hazmat assistance via a safe route.
