

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, October 17, 2018 – 0800 MT
National Preparedness Level 1**

National Fire Activity

Initial Attack Activity:	Light (44) new fires
New large incidents:	1
Large fires contained:	0
Uncontained large fires:**	5
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	3
Type 2 IMTs committed:	2

**Uncontained large fires include only fires being managed under a full suppression strategy.
[Link](#) to Geographic Area daily reports.

In support of Hurricane Florence, NIMO (Houseman) has mobilized to New Bern, NC.

In support of Hurricane Michael, IMT 1 (Dueitt) and IMT 2 (Goff) have mobilized to Florida.

Active Incident Resource Summary

Southern Area (PL 2)

New fires: 11
 New large incidents: 1
 Uncontained large fires: 0
 Type 1 IMTs committed: 2

Hurricane Michael, Florida Forest Service. Florida IMT 1 (Mousel) has mobilized to Niceville, FL and Florida IMT 1 (Leneave) has mobilized to Bay County, FL for logistical support. Area and road closures in effect.

* **Hurricane Michael GEMA**, Georgia Forestry Commission. Personnel providing logistical support and clearing of roadways. Road closures in effect.

Northwest Area (PL 1)

New fires: 1
 New large incidents: 0
 Uncontained large fires: 3
 Type 2 IMTs committed: 1

Klondike, Rogue River-Siskiyou NF. IMT 2 (Knerr). Nine miles northwest of Selma, OR. Timber and brush. Active fire behavior with uphill runs, torching and spotting. Numerous structures threatened. Evacuations, road, area and trail closures in effect. Reduction in acreage due to more accurate mapping.

Stukel, Lakeview District, BLM. Eleven miles southeast of Klamath Falls, OR. Brush and tall grass. Minimal fire behavior. Road and area closures in effect. Reduction in acreage due to more accurate mapping.

Cougar Creek, Okanogan-Wenatchee NF. Twelve miles northwest of Ardenvoir, WA. Timber, brush and short grass. No new information. Last report unless new information is received.

*** **Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.**

*** Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

Predictive Service Discussion: The upper level trough formerly over the Great Lakes region will begin to move east by afternoon and will produce windy conditions across New England. High pressure extending east from Bermuda will continue to allow for dry conditions across the Florida Peninsula and Panhandle. Showers will be on the increase across Texas as moisture works its way north from the Bay of Campeche. Low pressure over the Four Corners will begin to weaken, so some weakening of the Santa Ana winds is expected across California. Temperatures elsewhere across the West will remain warm and dry.

Dozer/Plow Operations

Vehicles & Roads Category

Dozers/tractor plows provide suppression and support capability for fire operations. When working on or around dozers on the fireline, it is important to respect the following guidelines:

- Load/unload equipment from the transport in a safe manner on a level, stable surface.
- Park transport in an area free of fuel. Clear an area if needed to protect parked equipment.
- Do not sit or bed down near equipment. Walk around the equipment before starting or moving it.
- Lower the dozer blade and/or fire plow to the ground when the equipment is idling or stopped.
- When working a dozer or tractor plow, stay at least 100 feet in front or 50 feet behind the equipment.
- Allow no one but the operator to ride on the equipment.
- Never get on or off equipment while it is moving.
- Provide front and rear lights for equipment working at night or in heavy smoke.
- Provide lights and fluorescent vests to personnel working with dozer/tractor plow units.
- Use hand signals for direction and safety.
- Do not use a dozer or tractor plow without a canopy or brush guard, and radio communications.
- Operators will wear required PPE and carry a fire shelter.
- Be aware of different fuel types, rates of spread, and flammability.
- Watch for wetlands, steep slopes, rocks, ditches, and other obstacles that might stop the equipment.
- Do not get too far ahead of a firing crew during firing operations.
- Anchor the line to a secure firebreak and create a black line (burn out) until the fire is completely enclosed.
- Tractor plow operators should wear headgear protection for head, face, eyes, and ears while also providing radio reception and ventilation capabilities.
- Tractor plow crews should consist of a minimum of two people.
- When the dozer or tractor plow is equipped with a hand-clutch lever, always take equipment out of gear when mounting and dismounting.
