

**National Interagency Coordination Center  
Incident Management Situation Report  
Thursday, October 25, 2018 – 0800 MT  
National Preparedness Level 1**

**National Fire Activity**

Initial Attack Activity: Light (36) new fires  
 New large incidents: 0  
 Large fires contained: 1  
 Uncontained large fires:\*\* 1  
 Area Command teams committed: 0  
 NIMOs committed: 1  
 Type 1 IMTs committed: 3  
 Type 2 IMTs committed: 1

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

In support of Hurricane Michael, Florida IMT 1 (Leneave) has mobilized to Bay County, Florida.

\*\*\* Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

\*\*\*Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

**Predictive Service Discussion:** An overall quiet westerly flow will be in place across a majority of the country today as the previous day's front exits the East Coast. Dry conditions are expected in most areas along with seasonally average temperatures. Shower activity will be limited mainly to Northern California, Oregon, and the Northern Rockies where a weakening cold front will slowly continue on an easterly track. Some shower activity will be possible across Florida as a stationary front continues to slowly weaken. Fire weather-related concerns will be mainly limited to Southern California where a weak off shore flow will continue.

## FireFit

*“Fitness can neither be bought nor bestowed,  
like honor it must be earned”*

### *Firefighter Health & First Aid*

- The FireFit program was created with the intent of providing the interagency wildland fire community with a comprehensive, easy-to-follow, fitness program with the ultimate goal of improving firefighter safety and health and reducing injuries. This program provides a basic format for a well-balanced fitness program that can be augmented as local units see fit. Program success will rely on management support at every level as well as individual's motivation and participation.
- Fitness is defined as, “the body's ability to perform physical activity without distress or injury.” Although most people rarely engage in arduous physical activity as part of their daily jobs, wildland firefighters know that physical fitness plays an important role in our personal wellness and job performance. It's a proven fact that by incorporating a balanced fitness program into our daily work life, we enhance our health and safety, while mitigating our risk of injury and illness and increasing our ability to do work.
- The following checklist will help to guide you in preparation for all levels of fitness activities:
  - Consult with your physician
  - Establish goals
  - Make the commitment to yourself and your crew
  - Get educated – the more you know, the healthier and safer you will be
  - Have the appropriate footwear and clothing for exercise
  - Adhere to your agency procedures for fitness and medical clearance
- In order to implement a balanced fitness program, it's important to include all of the essential components of fitness. When developing a fitness program, it's good practice to incorporate the F.I.T. Prescription = Frequency, Intensity, and Time. Utilizing the F.I.T. Prescription allows you to exercise safely while achieving steady improvements.

In his book, “[Fitness and Work Capacity, 2nd Edition](#),” Dr. Brian Sharkey has developed an Aerobics Fitness Index (page 9) that provides a good calculation for determining your level of aerobic fitness which is based on your level of physical activity.

- Click on [Fire Season Exercises](#) to complement and enhance your current fitness program and go to the [FireFit](#) homepage for many more ideas.
