Predictive Services Discussion: An upper level trough will move east toward the coast of the Pacific Northwest. By afternoon, breezy southwesterly winds will be possible across Washington, Oregon and Northern California as a cold front begins to approach the coast. High pressure off the Californian coast will begin to strengthen and will lead to warmer temperatures across the southern half of the state. The monsoon over the Southwest will remain strong as the high-pressure ridge to the east continues to strengthen the southerly flow. Texas will continue to see scattered showers and storms. Along the East Coast, the heat will continue. The ridge will begin to flatten, so the Northeast could see some slight cooling. Expect a windy westerly flow across New England. In the South, hot and humid conditions will continue. Scattered storms are expected along the coast in the afternoon.

The 10 Standard Fire Orders

Operational Engagement Category

The orders are arranged according to their importance and grouped in logical sequence. Review and consider Standard Fire Orders as a part of every shift.

- Did you receive or request adequate weather briefing, current and predicted fire behavior, wind direction, predicted humidity, fuel moisture, and/or local factors?
- Do you have a map of the fire? Is topography, type of fuels, and direction of the spread defined?
- The Fire Behavior group deals with what the firefighter will encounter - weather, fire status, and fire behavior.
 1. Keep informed on fire weather conditions and forecasts.
 2. Know what your fire is doing at all times.
 3. Base all actions on current and expected behavior of the fire.
- Are you familiar with direction, distance, location, size of escape routes, and safety zones?
- Discuss the need for a lookout, such as extreme fire behavior, and fire located out of line-of-sight.
- Discuss importance of situational awareness.
- The Fireline Safety group emphasizes personal safety.
 4. Identify escape routes and safety zones, and make them known.
 5. Post lookouts when there is possible danger.
 6. Be alert. Keep calm. Think clearly. Act decisively.
- Review importance and means of passing tactical decisions and resource movement.
- Review other factors influencing potential changes in tactics, which could affect control of your forces.
- The Organizational Control group is centered around tactical decisions.
 7. Maintain prompt communications with your forces, your supervisor and adjoining forces.
 8. Give clear instructions and insure they are understood.
 9. Maintain control of your forces at all time.
- After you have considered, discussed and acted on the previous nine orders:
 10. Fight fire aggressively, having provided for safety first.
