

**National Interagency Coordination Center**  
**Incident Management Situation Report**  
**Tuesday, September 11, 2018 – 0530 MT**  
**National Preparedness Level 3**

**National Fire Activity**

Initial Attack Activity:	Light (87 fires)
New large incidents:	2
Large fires contained:	4
Uncontained large fires:**	26
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	5
Type 2 IMTs committed:	12

Nationally, there are 59 large fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

One RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 141st Air Refueling Wing (Washington Air National Guard) has been deployed to Spokane, WA in support of wildland fire operations in the West.

### Northwest Area (PL 3)

New fires:	18
New large incidents:	0
Uncontained large fires:	7
Type 1 IMTs committed:	3
Type 2 IMTs committed:	4

**Klondike**, Rogue River-Siskiyou NF. IMT 1 (Dueitt). Nine miles northwest of Selma, OR. Timber and brush. Minimal fire behavior. Numerous structures threatened. Road, area and trail closures in effect.

**Crescent Mountain**, Okanogan-Wenatchee NF. Transfer of command from IMT 1 (Turman) to IMT 1 (Schulte) will occur tomorrow. IMT is also managing the McLeod and Holman incidents. Eighteen miles west of

Winthrop, WA. Timber. Moderate fire behavior with backing, creeping and isolated torching. Road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

**McLeod**, Okanogan-Wenatchee NF. Six miles north of Mazama, WA. Timber. Moderate fire behavior with isolated torching, backing and creeping. Road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

**Holman**, Okanogan-Wenatchee NF. Nineteen miles northwest of Mazama, WA. Timber. Minimal fire behavior. Structures and communication infrastructure threatened. Road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

**Terwilliger**, Willamette NF. Transfer of command from IMT 2 (Connell) to IMT 2 (Johnson) will occur tomorrow. Five miles southeast of Blue River, OR. Timber, hardwood litter and closed timber litter. Moderate fire behavior with smoldering, backing and creeping. Numerous structures threatened. Road, area and trail closures in effect. Precipitation occurred over the fire area yesterday.

**Natchez**, Rogue River-Siskiyou NF. IMT 2 (Knerr). Fifteen miles southeast of Cave Junction, OR. Timber, brush and hardwood litter. Active fire behavior with uphill runs, isolated torching and backing. Numerous structures threatened. Road, area and trail closures in effect.

**Cougar Creek**, Okanogan-Wenatchee NF. Transfer of command from IMT 2 (Lawson) back to the local unit will occur today. IMT is also managing the Bannock Lakes incident. Twelve miles northwest of Ardenvoir, WA. Timber, brush and short grass. Moderate fire behavior with flanking, backing and creeping. Road, area and trail closures in effect.

**Bannock Lakes**, Okanogan-Wenatchee NF. Fourteen miles southwest of Stehekin, WA. Timber and brush. Minimal fire behavior. Trail closures in effect. Last narrative report unless significant activity occurs.

**Tepee 1144 NE**, Deschutes NF. Fifteen miles southeast of Bend, OR. Timber, brush and short grass. Moderate fire behavior with creeping and smoldering. Structures threatened. Road, area and trail closures in effect. Reduction in acreage due to more accurate mapping.

**Willow 1145 RN**, Prineville District, BLM. Three miles east of Madras, OR. Chaparral, brush, and tall grass. Minimal fire behavior. Structures threatened. Road and area closures in effect.

**Miles**, Umpqua NF. Five miles northeast of Trail, OR. Timber. Active fire behavior with group torching, creeping and spotting. Structures threatened. Road, area and trail closures in effect.

**Predictive Services Discussion:** A very cool upper level low pressure area will begin to move into the Pacific Northwest from the Gulf of Alaska. Wetting rains are expected across the Washington Cascades and the Okanogan by afternoon. South of this system across Oregon, the Great Basin and northern California, very breezy winds and low humidity will create critical fire weather conditions. Some of the critical conditions could extend into Montana, though humidity will be slightly elevated. Across the Southeast, moderate to heavy rainfall will continue across the Deep South and along the Atlantic Coast, as a slow-moving front continues to be saturated with tropical moisture. In the Pacific, the northern coasts of the Hawaiian Islands can expect breezy winds and heavy rainfall, as a weakening tropical storm moves from east to west across the islands.

## Aviation Communications

Aviation Category

Discuss the following information in terms of effective communication with aircraft. Involve the pilot in this discussion.

- Establish an air-to-ground frequency on the fire, and make sure everyone knows it.
- Avoid switching frequencies in the middle of an operational period.
- Discuss Guard frequencies:
  - How they work.
  - When to use them.
  - What frequencies are established for aircraft in your area?
- Aviation communications should be clear, concise, short, and to the point.
- Use standard terminology that can be understood by all people. Do not use local slang.
- Know what you want to say before you key the microphone. Don't think and talk at the same time.
- Before you key your microphone to talk, be sure to listen to ensure you don't cut into another transmission.
- Identify who you want to talk to by the call sign and identify yourself in every transmission.
- If the frequency gets congested, request another frequency. Upon receipt, ensure that all people who need to be on the new frequency transfer to that frequency.
- When giving ground descriptions, describe the location as if you are viewing the location from the direction an aircraft would be traveling. Use a common frame of reference for the sender and receiver.
- Use easily understandable directions, such as north, south, east, west, 2 o'clock, 9 o'clock, left 20 degrees, right 45 degrees, etc.
- When giving directions, always give them in relation to the pilot's perspective.
