

National Interagency Coordination Center
Incident Management Situation Report
Saturday, September 15, 2018 – 0530 MT
National Preparedness Level 3

National Fire Activity

| | |
|-------------------------------|------------|
| Initial Attack Activity: | Light (56) |
| New large incidents: | 1 |
| Large fires contained: | 3 |
| Uncontained large fires:** | 29 |
| Area Command teams committed: | 0 |
| NIMOs committed: | 0 |
| Type 1 IMTs committed: | 6 |
| Type 2 IMTs committed: | 9 |

Nationally, there are 59 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

In support of Hurricane Florence, three Type 2 Incident Management Teams (Parrish, Goff and Rabe) are mobilizing to the Center for Domestic Preparedness in Anniston, AL.

| Active Incident Resource Summary | | | | | | |

*** Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

Predictive Services Discussion: Flooding will continue across the mid-South as Florence weakens into a tropical storm and moves inland across South Carolina. Moderate to heavy rainfall will continue which will lead to flooding concerns. Elsewhere, overall dry conditions are expected across the West, except along the Canadian border where scattered showers will remain possible. Southwesterly winds across the West will be breezy across southern Idaho, northern Utah, and Wyoming. Dry conditions are expected across the Four Corners, as high pressure remains focused over Colorado and New Mexico.

Communications (LCES)

Fire Communications Category

Effective communication is a critical backbone of safe and successful operations.

- Discuss the factors that can affect radio communication at the incident.
 - Knowledge of the radio issued to the individuals
 - Net control, frequencies
 - Line-of-sight restrictions
 - Antenna polarization effect (direction of the antenna)
 - Minimizing noise interference
 - Wide band vs. narrow band
 - Potentially unfamiliar local jargon (e.g. coulee, candlestick, fence post, etc.)
- How can you mitigate potential problems?
 - Implement effective communication procedures – use clear text; be brief and to-the-point.
 - Give a good comprehensive briefing. (Refer to the Briefing Checklist inside the back cover of the Incident Response Pocket Guide.)
 - Confirm that relayed information is received and understood.
 - Keep a continuous information flow (e.g., updates on weather, fire behavior, work progress; changes in strategy/tactics; arrival of additional resources; solicit feedback).
 - Establish emergency check-in procedures.
 - Provide a minimum of 4 radios per 20-person firefighter crew.
- The Five Communication Responsibilities for All Firefighters:
 - Brief others
 - Debrief your actions
 - Communicate hazards to others
 - Acknowledge messages
 - Ask if you don't know
