

National Interagency Coordination Center
Incident Management Situation Report
Thursday, September 20, 2018 – 0530 MT
National Preparedness Level 3

National Fire Activity

Initial Attack Activity:	Light (55 fires)
New large incidents:	1
Large fires contained:	1
Uncontained large fires:**	20
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	4
Type 2 IMTs committed:	13

Nationally, there are 59 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

Three Type 2 Incident Management Teams have mobilized in support of Hurricane Florence. IMT 2 (Goff) is staged in Columbia, SC. IMT 2 (Parrish and Rabe) are staged in Atlanta, GA.

Great Basin Area (PL 4)

New fires:	7
New large incidents:	1
Uncontained large fires:	7
Type 1 IMTs committed:	2
Type 2 IMTs committed:	2

Pole Creek, Uinta-Wasatch-Cache NF. IMT 1 (Lund). Twelve miles northeast of Nephi, UT. Timber and brush. Extreme fire behavior with wind-driven runs, group torching and long-range spotting. Numerous residences and energy infrastructure threatened. Evacuations, road, area and trail closures in effect.

Bald Mountain, Uinta-Wasatch-Cache NF. IMT 1 (Pechota). Seven miles northeast of Mona, UT. Timber and brush. Active fire behavior with short crown runs, short-range spotting and backing. Numerous residences and energy infrastructure threatened. Evacuations, road, area and trail closures in effect.

Roosevelt, Bridger-Teton NF. IMT 2 (Chadwick). Thirty-two miles south of Jackson, WY. Timber and brush. Active fire behavior with flanking, torching and spotting. Numerous structures and communication infrastructure threatened. Evacuations, road, area and trail closures in effect.

Marten Creek, Bridger-Teton NF. IMT 2 (Rohrer). Thirteen miles east of Afton, WY. Timber. Active fire behavior. Structures threatened. Road and area closures in effect.

Slate, Uinta-Wasatch-Cache NF. Six miles east of Kamas, UT. Timber. Moderate fire behavior with backing, creeping and torching.

Indian Butte, Clark County. Eight miles northwest of Dubois, ID. Timber, brush and short grass. Minimal fire behavior. Road and area closures in effect.

* **Oneida**, Franklin County. Started on private land six miles northeast of Preston, ID. Brush and short grass. Active fire behavior with running. Structures threatened.

*** Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

Prescribed Service Discussion: A northeasterly flow will develop across the Northern Rockies in the wake of the previous day's front. Scattered showers will remain possible along the Bitterroot Divide between Idaho and Montana. A breezy, dry northwesterly flow will be present south and west of this boundary. Critical fire weather conditions may be possible across northern California, as a northerly flow develops on the north end of the Sacramento Valley. Scattered storms will be possible across the Great Plains, as a passing cold front moves east toward the Ohio and Mississippi River Valleys. The East will remain warm and dry under the continued influence of the Bermuda High positioned just off the Carolina Coast.

ATV – Safety

Vehicles/Roads Category

The use of ATVs for wildland fire suppression and prescribed fire operations has increased dramatically over the last ten years. Note: Several agencies have required training for ATV operations (check your agency's requirements).

Most injuries associated with ATVs occur when:

- The driver loses control. When the operator encounters a change of terrain or swerves to avoid an obstacle, it causes an abrupt change of balance and loss of control.
- The vehicle rolls over.
- The driver or passenger is thrown off.
- The operator's loss of attention to what, where, and how an ATV is being operated.
- There is a collision with a fixed object.

Identified contributing factors to ATV accidents include:

- Rider inexperience.
- Excessive speed, combined with rough terrain, can create enough pitch and bounce to cause the operator to lose control of the vehicle.
- Lack of helmet use.
- The ATV is improperly loaded or load weight exceeds vehicle operation capacity.
- The operator carries a passenger that affects the operator's control and operation of the ATV.

Safety measures for ATV use include:

- Conduct pre-ride inspection: checking tires, throttle cable, front and rear brakes, lights and switches, oil and fuel, chain or drive shaft, and air filter; cleaning out weeds and other debris from around engine and other hot components, and observing the chassis for any defects or wear.
- Single riders only – Injuries frequently occur to passengers; therefore, avoid riding double.
- Always wear PPE – helmets, eye protection, and protective clothing. Appropriate helmets are those designed for motorcycle (not firefighting) use. Include safety visors/face shields, goggles, or safety glasses for eye protection.
- Use headlights to improve visibility by other vehicles.
- Maintain speeds acceptable for riding conditions, especially over uneven terrain.
- Avoid traversing slopes.
- Mounted or towed loads should not exceed manufacturer's recommendation. Properly mount loads so that weight transfer does not affect the center of gravity of the machine – mounting a tank (e.g., drip torch) on the rear of the vehicle increases the chances for a rear turnover.
- Do not drive on public roads. Collisions with automobiles on public roads are the most common cause of fatal ATV accidents. It may be illegal to operate an ATV on public roads – check your state's laws.
