

National Interagency Coordination Center
Incident Management Situation Report
Friday, September 21, 2018 – 0530 MT
National Preparedness Level 3

National Fire Activity

Initial Attack Activity:	Light (60 fires)
New large incidents:	2
Large fires contained:	10
Uncontained large fires:**	18
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	4
Type 2 IMTs committed:	8

Nationally, there are 53 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Great Basin Area (PL 4)

New fires:	5
New large incidents:	0
Uncontained large fires:	5
Type 1 IMTs committed:	2
Type 2 IMTs committed:	2

Pole Creek, Uinta-Wasatch-Cache NF. IMT 1 (Lund). Twelve miles northeast of Nephi, UT. Timber and brush. Extreme fire behavior with wind-driven runs, group torching and short-range spotting. Numerous residences and energy infrastructure threatened. Evacuations, road, area and trail closures in effect.

Bald Mountain, Uinta-Wasatch-Cache NF. IMT 1 (Pechota). Seven miles northeast of Mona, UT. Timber and brush. Active fire behavior with short crown runs, uphill runs and backing. Numerous residences and energy infrastructure threatened. Evacuations, road, area and trail closures in effect.

Roosevelt, Bridger-Teton NF. IMT 2 (Chadwick). Thirty-two miles south of Jackson, WY. Timber and brush. Extreme fire behavior with short crown runs, torching and spotting. Numerous structures and communication infrastructure threatened. Evacuations, road, area and trail closures in effect.

Marten Creek, Bridger-Teton NF. IMT 2 (Rohrer). Thirteen miles east of Afton, WY. Timber. Active fire behavior with wind-driven runs, short crown runs and group torching. Road and area closures in effect. Reduction in acreage due to more accurate mapping.

Slate, Uinta-Wasatch-Cache NF. Six miles east of Kamas, UT. Timber. Active fire behavior with backing, spotting and torching.

Bum Creek, Payette NF. Previously reported incident. Ten miles east of Yellow Pine, ID. Timber. Moderate fire behavior with short crown runs and creeping. Last narrative report unless significant activity occurs.

Prescribed Service Discussion: A westerly flow will resume across much of the country as temperatures remain near average in most areas. Breezy conditions are expected near the mountain passes in the mountains across the northern tier of the country. Showers will develop in the Cascades by afternoon and spread east into the Okanogan by evening. A stationary front positioned across the South will allow for a return to wet conditions across Texas, Louisiana, Mississippi, and Tennessee. All in all, widespread critical fire weather conditions are not expected today across the country.

Downhill Fireline Construction Checklist

Operational Engagement Category

Downhill fireline construction is hazardous in steep terrain, fast-burning fuels, or rapidly changing weather. Downhill fireline construction should not be attempted unless there is no tactical alternative. When building downhill fireline, the following is required:

- Crew supervisor(s) and fireline overhead discuss assignments prior to committing crew(s). Responsible overhead individual (TFLD or ICT4 qualified or better) will stay with resources until the job is completed.
- Decision will be made after proposed fireline has been scouted by supervisor(s) of involved crew(s).
- LCES will be coordinated for all personnel involved.
 - Crew supervisor(s) is in direct contact with lookout who can see the fire.
 - Communication is established between all crews.
 - Rapid access to safety zone(s) is ensured in case fire crosses below crew(s).
- Direct attack will be used whenever possible; if not possible, the fireline should be completed between anchor points before being fired out.
- Fireline will not lie in or adjacent to a chute or chimney.
- Starting point will be anchored for crew(s) building fireline down from the top.
- Bottom of the fire will be monitored; if the potential exists for the fire to spread, action will be taken to secure the fire edge.
- Can fire be carried with you?
