

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, September 23, 2018 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial Attack Activity:	Light (65) new fires
New large incidents:	2
Large fires contained:	1
Uncontained large fires:**	21
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	5
Type 2 IMTs committed:	9

Nationally, there are 53 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Prescribed Service Discussion: The previous days' westerly flow will continue across the country as temperatures remain near average in most areas. Breezy conditions are expected near the mountain passes across the northern tier of the country. At the surface, a weak Alberta Clipper will drop south into the northern Great Plains producing a breezy northerly flow. A stationary front positioned across the South will allow for a return to wet conditions across Texas, Arkansas, Louisiana, and Tennessee. Widespread critical fire weather conditions are not expected today across the country.

Aviation Mishap Response

Aviation Category

Having a written mishap response action posted and accessible to all employees is an important first step. Having a list of actions to follow will ensure that nothing is missed in a stressful, time-critical period. Response plans have to be briefed to all on the crew.

- Immediate, positive action is necessary. Any delay may affect someone's chances of survival.
- Conduct rescue operations keeping the following priorities in mind:
 - Preserve life. Rescuers first!!!
 - Do whatever is necessary to extricate injured occupants and to extinguish fires, keeping in mind the necessity of protecting and preserving evidence.
 - Document and/or photograph the location of any debris that must be disturbed in order to carry out rescues and/or fire suppression activities.
 - Secure the area. Treat the crash site as a crime scene. Arrange for security at the accident scene if necessary. Determine if hazardous materials were on the aircraft. Deny access except to credentialed officials and escorted media.
- Be aware that crash sites can be dangerous due to hazardous cargo, flammable and toxic fluids, sharp objects, disease, adverse terrain, hot/cold weather conditions, and fire.
- Exercise good judgment, utilize available protective devices and clothing, and use extreme caution when working near the wreckage site.
- Do not exceed your physical limitations.

Activity: *Review your unit's mishap response plan with the crew. Consider practicing with a crash rescue drill or scenario.*
