

**National Interagency Coordination Center  
Incident Management Situation Report  
Monday, September 24, 2018 – 0530 MT  
National Preparedness Level 3**

**National Fire Activity**

|                               |                      |
|-------------------------------|----------------------|
| Initial Attack Activity:      | Light (60) new fires |
| New large incidents:          | 3                    |
| Large fires contained:        | 0                    |
| Uncontained large fires:**    | 21                   |
| Area Command teams committed: | 0                    |
| NIMOs committed:              | 1                    |
| Type 1 IMTs committed:        | 4                    |
| Type 2 IMTs committed:        | 9                    |

Nationally, there are 54 large fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

## Great Basin Area (PL 4)

|                          |   |
|--------------------------|---|
| New fires:               | 9 |
| New large incidents:     | 1 |
| Uncontained large fires: | 8 |
| Type 1 IMT's committed:  | 3 |
| Type 2 IMT's committed:  | 3 |

**Roosevelt**, Bridger-Teton NF. Transfer of command from IMT 2 (Chadwick) to IMT 1 (Demasters) will occur today. Thirty-two miles south of Jackson, WY. Timber and brush. Extreme fire behavior with group torching, spotting and crowning. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

**Pole Creek**, Uinta-Wasatch-Cache NF. IMT 1 (Lund). Twelve miles northeast of Nephi, UT. Timber and brush. Moderate fire behavior with flanking, isolated torching and short-range spotting. Numerous residences and transportation and energy infrastructure threatened. Evacuations, road, area and trail closures in effect.

**Bald Mountain**, Uinta-Wasatch-Cache NF. IMT 1 (Pechota). Seven miles northeast of Mona, UT. Timber and brush. Active fire behavior with short-range spotting, backing and isolated torching. Numerous residences and transportation and energy infrastructure threatened. Evacuations, road, area and trail closures in effect.

**\* Mirror Lake Complex** (2 fires), Uinta-Wasatch-Cache NF. IMT 2 (Roide). Includes previously reported Slate and Murdock incidents. Thirteen miles east of Kamas, UT. Timber and light logging slash. Active fire behavior with torching, spotting and backing. Road, area and trail closures in effect.

**Marten Creek**, Bridger-Teton NF. IMT 2 (Rohrer). Thirteen miles east of Afton, WY. Timber and brush. Moderate fire behavior with isolated torching, backing and creeping. Structures threatened. Road and area closures in effect.

**Conner**, Cassia County. Four miles southwest of Malta, ID. Brush and short grass. Active fire behavior with uphill runs, torching and short crown runs. Residences and sage-grouse habitat threatened.

**8 Mile**, Bear Lake County. Five miles south of Soda Springs, ID. Timber, brush and short grass. Minimal fire behavior. Structures threatened.

\*\*\* Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

\*\*\*Additional wildfire information is available through the Geographic Areas at <http://gacc.nifc.gov/>

**Prescribed Service Discussion:** A very broad, flat upper level trough will be present over most of the country, keeping temperatures near normal again today. Breezy westerly flow will be present across the northern Great Plains as a cold front remains stalled as it stretches from the Great Lakes to eastern Montana. Northerly flow across northern California will lead to pockets of critical fire weather conditions as the downslope flow moves into the Sacramento Valley. Looking elsewhere, the remnants of a frontal boundary will remain stretched out across the central Atlantic Coastline and the Deep South. This will serve as a focus point for scattered showers and storms.

## Falling Snags

*Felling Safety Category*

Snags (dead, standing trees without leaves or needles in the crowns) and other hazard trees present a significant hazard to wildland firefighters. Snags typically have much lower fuel moistures than live, green trees; they are subject to rot and they burn more readily. In the process, they often throw firebrands far in advance of the main fire and often burn through more quickly than green trees, falling with little or no warning. Live, green trees weakened by insects, disease, weather, past fires, and age present an equal hazard and can fall without warning.

- The risk of injuries from hazard trees increases during the night operational period when visibility is greatly reduced.
- While the cooler, nighttime period is generally a more effective time to gain control of wildfires, the increased risk from unseen falling snags and weakened live trees may limit the widespread use of crews at night in areas of fire-weakened or dead and dying timber.
- Environmental conditions that increase risk from hazard trees: strong winds or erratic winds from storm cells, night operations, machine operations., air operations - cargo drops, water or retardant drops, helicopter take off/landing, low-level flights, steep slopes, and diseased or bug-killed areas.
- Things to consider when assessing the potential dangers of hazard trees: Trees have been burning for an extended period. High-risk tree species (those known for rot and shallow root systems) are in the area. Numerous downed trees. Dead or broken tips and limbs overhead. Accumulation of downed limbs. Tree decay, cavities, splits, cracks. Absence of needles, bark or limbs. Leaning or hung-up trees. Roots damaged by equipment or erosion.
- Mitigation measures to take: Identify and flag all high-risk areas until the hazard has been removed. Keep personnel out of the high-risk areas until the hazard has been removed. Use qualified saw teams and felling bosses. Establish lookouts. Plan a quick and safe escape route. Do not turn your back on a falling tree. Maintain situational awareness.

### Lessons lost

I am not falling that snag
