

**National Interagency Coordination Center  
Incident Management Situation Report  
Thursday, August 1, 2019 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (131 new fires)
New large incidents:	3
Large fires contained:	0
Uncontained large fires:**	13
Area Command teams committed:	0
NIMOs committed:	2
Type 1 IMTs committed:	1
Type 2 IMTs committed:	5

Nationally, there are 103 large fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

\*1 Hectare = 2.47 Acres

**Predictive Services Discussion:** A cold front will move into the Pacific Northwest, drawing monsoonal moisture northward through the Great Basin and into the Northern Rockies. Scattered storms are expected from the Rocky Mountain Front west over the Divide and into the Great Basin. Storms will be mostly on the wet side, but lightning should be abundant. A few drier storms will be possible across central Oregon and extreme northern California. A trough of low pressure located over the East will keep temperatures slightly below average. Scattered storms will be possible across the Carolinas and Georgia, as a weakening frontal boundary remains stalled over the region. In Alaska, widespread showers will be possible through afternoon across the eastern Interior; while most of the remainder of the state begins to dry out. Temperatures will be slightly below average as a trough lingers over the states midsection.

## Spot Weather Forecast

*Weather- Fire Behavior Category*

Spot weather forecasts should be requested or submitted online for those fires that have potential for extreme fire behavior, exceed initial attack, or are located in areas where Red Flag Warnings have been issued.

● Basic elements needed for a spot weather forecast include:

- Name of fire and management agency.
- Request time and date.
- Location by ¼ section.
- Drainage name.
- Exposure
- Size
- Elevation (top and bottom).
- Fuel type.
- Fire character (ground, crown, etc.).
- Weather conditions (place, elevation, observation time, wind direction, wind velocity, dry bulb, wet bulb, remarks and important U.S. indicators).

**Activity: Calibrate your Kestrel and review belt weather kit use.**
