

National Interagency Coordination Center
Incident Management Situation Report
Friday, August 2, 2019 – 0530 MT
National Preparedness Level 2

National Fire Activity

Initial attack activity:	Light (131 new fires)
New large incidents:	8
Large fires contained:	8
Uncontained large fires:**	16
Area Command teams committed:	0
NIMOs committed:	2
Type 1 IMTs committed:	1
Type 2 IMTs committed:	4

Nationally, there are 78 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Alaska Area (PL 3)

New fires:	2
New large incidents:	4
Uncontained large fires:	0
NIMOs committed:	1
Type 2 IMTs committed:	1

Chalkyitsik Complex (4 fires), Upper Yukon Zone, BLM. IMT 2 (AK Green Team). Fifteen miles east of Chalkyitsik, AK. Timber. Moderate fire behavior with isolated torching, flanking and backing. Numerous structures threatened.

Cornucopia Complex (9 fires), Upper Yukon Zone, BLM. NIMO (Portland). Twenty-five miles west of Fort Yukon, AK. Timber and brush. Active fire behavior with group torching and flanking.

* **Louis Lake**, Galena Zone, BLM. Started on FWS land 34 miles southwest of Huslia, AK. Brush and hardwood slash. Minimal fire behavior. Last narrative report unless significant activity occurs.

* **Hodatic River**, Galena Zone, BLM. Started on FWS land 50 miles northwest of Huslia, AK. Brush, hardwood slash and short grass. Minimal fire behavior. Last narrative report unless significant activity occurs.

* **Lockwood Hills**, Galena Zone, BLM. Started on NPS land 61 miles north of Ambler, AK. Brush and hardwood slash. Minimal fire behavior. Last narrative report unless significant activity occurs.

* **Killak**, Galena Zone, BLM. Started on NPS land 48 miles east of Ambler, AK. Brush, hardwood slash and short grass. Minimal fire behavior. Last narrative report unless significant activity occurs.

East Stoney River, Southwest Area Forestry, Alaska DOF. Previously reported incident. Timber. Minimal fire behavior. Last narrative report unless significant activity occurs.

Pete Andrews Creek, Southwest Area, Alaska DOF. Previously reported incident. Started on Native Corporation land 10 miles west of Newhalen, AK. Short grass. Minimal fire behavior. Last narrative report unless significant activity occurs.

Jump Peak, Southwest Area, Alaska DOF. Previously reported incident. Timber. Moderate fire behavior with backing, creeping and smoldering. Last narrative report unless significant activity occurs.

Beaver, Alaska Fire Service Military Zone, BLM. Previously reported incident. Timber, brush and tall grass. Minimal fire behavior with smoldering and creeping. Last narrative report unless significant activity occurs.

Swift Creek, Southwest Area, Alaska DOF. Previously reported incident. Thirty-three miles southeast of Aniak, AK. Timber. Minimal fire behavior. Last narrative report unless significant activity occurs.

Predictive Services Discussion: A passing cold front will gain strength as it moves east from the Pacific Northwest into the Northern Rockies. As it moves east, it will draw monsoonal moisture northward from the Southwest into Alberta along the Continental Divide. Most storms that form should be wet, but there is a chance that a few over eastern Idaho and Wyoming could be dry. To the west, a breezy to windy westerly flow will develop over the Pacific Northwest and over northern Idaho. Surface humidities will be moderately low, buffered somewhat by cooler than average temperatures that should stretch as far south as southern Oregon. Convective activity will continue along the East Coast, as a cold front remains stalled off the Carolina Coast. In Alaska, a warming trend will begin as high pressure builds into the state's Interior from the southwest. Showers will be possible along the Bering Sea Coast during the late afternoon, as another cold front begins to approach.

Hazard Tree Identification

Felling Safety Category

Some Common tree deficiencies which contribute to potential felling hazards:

Weak Limbs: limbs of all sizes and species with decay evident cracking, loose hung-up or fire damaged limbs. Avoid working under overhead hazards.

Weak Tops: split/schoolmarm tops that could have weakened unions, fire weakened tops, rotten or dead tops.

Witches Broom: caused by mistletoe infection, limbs can grow very large and heavy (200+ lbs). Can contribute to uneven weight distribution.

Split Trunk: cracked trunk from frost, lightning, or wind. Visible evidence of advanced decay indicates serious weakness where the tree could fail. May increase wood fiber tension contributing to barber chair potential.

Stem Damage: caused by windfall, scarring, fire, machine, and animal damage, as well as heart rot diseases.

Cat Face: look for enough solid wood to construct an effective undercut and back cut. Complexity increases when desired felling direction is different than that of the cat face.

Thick Sloughing Bark: usually found on dead trees. Loose bark particularly on Douglas firs can injure sawyers.

Butt and Stem Cankers: usually found on deciduous trees but can occur on Douglas fir and pine. The infected areas weaken the stem.

Fungal Fruiting Bodies or Conks: found on stems may indicate massive interior rot. Excessive resinosis (resin flow) also indicates heart or root diseases.

Heavy Tree Lean: look for any ground cracks around the base of the tree. May be caused by damaged roots or lifting root mats, shallow or wet soils. In some cases, the tree may have corrected itself which can be determined by looking for corrected top growth.

Root Condition: Weakened roots may reduce felling control. Signs of decay or fungal conks on the roots or fire weakened roots.

Species Consideration: consult local experts for species deficiencies particular to local areas. A good habit is to observe overall tree stand health wherever you're working.

Felling a hazard tree requires accurate risk assessment and complexity analysis and demands the sawyer's full situational awareness. Do not bypass hazard trees without taking some action such as felling or establishing a No-Work-Zone.

Discuss indicators of tree defects specific to your local area.
