

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, August 14, 2019 – 0530 MT
National Preparedness Level 3**

National Fire Activity

Initial attack activity:	Light (115 new fires)
New large incidents:	4
Large fires contained:	4
Uncontained large fires:***	16
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	5

Nationally, there are 43 large fires being managed under a strategy other than full suppression.

*** Uncontained large fires include only fires being managed under a full suppression strategy.

Northwest Area (PL 2)

New fires:	15
New large incidents:	0
Uncontained large fires:	6
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

Williams Flats, Colville Agency, BIA. Transfer of command from IMT 2 (NW Team 8) back to the local unit will occur tomorrow. Five miles southeast of Keller, WA. Timber, brush and short grass. Minimal fire behavior with smoldering and creeping. Evacuations in place with structures threatened. Area and road closures in effect.

Ward, Lakeview District, BLM. IMT 1 (ODF Team 2). Thirteen miles west of Keno, OR. Timber and brush. Minimal fire behavior with creeping and smoldering.

163 HK Complex (3 fires), Umatilla NF, USFS. Transfer of command from IMT 2 (NW Team 6) back to the local unit will occur today. Fifteen miles north of Monument, OR. Timber, brush and light logging slash. Minimal fire behavior with creeping, smoldering and isolated torching. Area and road closures in effect.

MP 97, South Unit, Oregon DOF. One mile south of Canyonville, OR. Timber. Minimal fire behavior.

Predictive Services Discussion: The quiet westerly flow in place over much of the country will begin to give way late in the day as a low pressure system begins to drop south into the Pacific Northwest from western British Columbia. Breezy winds will develop across Oregon, Northern California, and Nevada by afternoon creating a critical environment where fuels are receptive. Isolated wet storms will be possible along the Continental Divide as the Four Corners high begins to migrate westward again and taps into a strengthening monsoonal flow coming up out of Mexico. In the East, scattered storms will be possible across the Carolinas and the Deep South as a stationary front lingers over the region.

Safety Zones 2 (LCES)

Operational Engagement Category

Continued from: [Safety Zones 1 \(LCES\)](#)

Safety Zone(s) are locations where the threatened firefighter may find refuge from the danger. Unfortunately shelter deployment sites have been incorrectly called safety zones. Safety zones should be conceptualized and planned as a location where no shelter is needed. This does not intend for the firefighter to hesitate to deploy their shelter if needed, just if a shelter is deployed the location is not a tree safety zone. Fireline intensity and safety zone topographic location determine safety zone effectiveness.

- How have you determined the distinction between a safety zone and a deployment zone?
- Is refuge in a vehicle or house an acceptable tactic?
- Consider access to the incident. You are often confronted with considerable distances of unburned fuel to cross. How do you mange Lookouts, Communications, Escape Routes, and Safety Zones (LCES)?
