

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, August 17, 2019 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (110 new fires)
New large incidents:	5
Large fires contained:	8
Uncontained large fires:***	15
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	1

Nationally, there are 41 large fires being managed under a strategy other than full suppression.

*** Uncontained large fires include only fires being managed under a full suppression strategy.

Link to Geographic Area daily reports.

Great Basin Area (PL 2)

New fires: 21
 New large incidents: 0
 Uncontained large fires: 4
 Type 2 IMTs committed: 1

Nethker, Payette NF, USFS. Transfer of command from IMT 2 (GB Team 3) back to the local unit will occur on 8/19. Thirty miles northeast of McCall, ID. Timber and closed timber litter. Moderate fire behavior with smoldering, creeping and isolated torching. Numerous structures threatened. Evacuations, area, road and trail closures in effect.

Wood Canyon, Carson City District, BLM. Seventy-five miles south of Winnemucca, NV. Timber, chaparral and short grass. Moderate fire behavior with smoldering and creeping.

Cove Creek, Salmon-Challis NF, USFS. Twenty-seven miles northwest of Salmon, ID. Timber and tall grass. Minimal fire behavior with creeping and smoldering. Structures threatened. Trail closures in effect.

Corta, Elko District, BLM. Eight miles southeast of Jiggs, NV. Timber, brush and tall grass. Minimal fire behavior.

Uncontained large fires: 5

Ward, Lakeview District, BLM. Thirteen miles west of Keno, OR. Timber and brush. Minimal fire behavior with smoldering. Infrastructure threatened.

Williams Flats, Colville Agency, BIA. Five miles southeast of Keller, WA. Closed timber litter, timber and short grass. Minimal fire behavior with smoldering, creeping and single tree torching. Structures threatened. Area and road closures in effect. Evacuations have been lifted. Reduction in acreage due to more accurate mapping.

163 HK Complex (3 fires), Umatilla NF, USFS. Fifteen miles north of Monument, OR. Timber, brush and light logging slash. No new information. Last report unless new information is received.

Predictive Services Discussion: The slightly cooler than average conditions will continue across the northern tier of the nation as the previous day's cold front moves east toward Minnesota and South Dakota. Temperatures behind the front will be near average but winds will be gusty, especially across eastern Montana. The dry, northerly winds across northern California will subside and become more westerly. Monsoonal convection will be isolated and limited mainly to New Mexico and Colorado. Texas will remain hot and dry. In the East, scattered showers and storms will be possible across New England and the Ohio River Valley as another front pushes east.

Nomexfi

Firefighter Health First-Aid Category

Nomexfi is the brand name for a **heat and flame-resistant** textile made by the DuPont chemical company and first marketed in 1967. Today, more than three million firefighters and aviation personnel around the world are protected by structure fire turnout gear, wildland fire personal protective equipment, and flight suits and jackets made of Nomexfi.

Nomexfi IS NOT flame-proof. It burns when you hold a flame to it, but stops burning once the heat source is removed. The thick woven structure of synthetic fibers is a very poor conductor of heat. When exposed to heat, the fibers expand closing the spaces between them insulating the wearer. But to work correctly, Nomexfi needs care.

Dirty Nomexfi

- Wash Nomexfi like normal laundry, but always include a rinse cycle that adequately removes soaps and detergents.
- Nomexfi garments should never be subjected to strong oxidizing agents such as peroxides or bleaches. These harm the physical strength of the fabric.
- Tumble-dry and remove while slightly damp. Over-drying damages the fabric.

Poison Oak/Ivy/Sumac on Nomexfi

MTDC researched the laundering of Nomexfi firefighting clothing that has been contaminated with urushiol oil (what causes the rash) from poison oak/ivy/sumac exposure.

- MTDC recommends that fire clothing contaminated with urushiol oil be cleaned following normal Nomexfi laundering procedures, with a degreaser such as a detergent or laundry soap, and as soon as possible.
- Extra care should be exercised when handling the contaminated clothing and should be kept separate from unaffected clothing and equipment.
- Put the affected clothing in a marked bag if you are giving it to someone else to wash. Before handling the affected clothing, apply a skin-barrier product such as Ivy Block or Technufi.

Fuel Soaked Nomexfi

Flammable contaminants will reduce the thermal performance of any flame-resistant garment including Nomexfi.

- Proper and periodic cleaning is essential to maintain thermal protective performance.

Action Item -

Nomexfi is not effective if it is excessively dirty, fuel-soaked, or has holes. Does your Nomexfi need to be washed, repaired or replaced?
