

**National Interagency Coordination Center  
Incident Management Situation Report  
Monday, August 26, 2019 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

|                               |                      |
|-------------------------------|----------------------|
| Initial attack activity:      | Light (95 new fires) |
| New large incidents:          | 4                    |
| Large fires contained:        | 6                    |
| Uncontained large fires:***   | 18                   |
| Area Command teams committed: | 0                    |
| NIMOs committed:              | 0                    |
| Type 1 IMTs committed:        | 2                    |
| Type 2 IMTs committed:        | 3                    |

Nationally, there are 34 large fires being managed under a strategy other than full suppression.

\*\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

**Alaska Area (PL 3)**

|                          |   |
|--------------------------|---|
| New fires:               | 1 |
| New large incidents:     | 0 |
| Uncontained large fires: | 3 |
| Type 1 IMTs committed:   | 1 |
| Type 2 IMTs committed:   | 2 |

**Swan Lake**, Kenai Kodiak Area, Alaska DOF. IMT 1 (GB Team 1). IMT is also managing the Caribou Lake incident. Started on FWS land five miles northeast of Sterling, AK. Timber, brush and short grass. Active fire behavior with torching, flanking and creeping. The communities of Sterling and Cooper Landing and numerous structures threatened. Area, road and trail closures in effect.

**Caribou Lake**, Kenai-Kodiak Area, Alaska DOF. Seven miles northwest of Fox River, AK. Heavy logging slash, timber and tall grass. Minimal fire behavior with creeping and single tree torching. Structures threatened.

**McKinley**, Mat-Su Area, Alaska DOF. IMT 2 (AK Green Team). Started on private land 18 miles north of Willow, AK. Timber and brush. Active fire behavior with backing, creeping and single tree torching. Numerous residences threatened. Area, road and trail closures in effect. Reduction in acreage due to more accurate mapping.

**Deshka Landing**, Mat-Su Area, Alaska DOF. IMT 2 (NW Team 10). Seven miles southwest of Willow, AK. Timber, brush and short grass. Moderate fire behavior with creeping, smoldering and isolated torching. Numerous structures threatened. Area, road and trail closures in effect. Reduction in acreage due to more accurate mapping.

\*1 Hectare = 2.47 Acres

**Predictive Services Discussion:** High pressure over the Southwest will begin to slightly weaken but remain quite strong as it remains firmly anchored over California, Nevada and Arizona. Expect a continuance of hot and dry conditions. Isolated storms will be possible in the southern Sierra as the remnants of a tropical system begin to move north along the coast of southern California. This passing system will not have as much moisture associated with it as most systems of this type do. To the east, the southwestern monsoon will be greatly suppressed due to the location of the ridge to the east. A northerly flow will keep the bulk of the moisture in Mexico. Only isolated storms are expected across New Mexico. A cold front moving east across the Great Plains into the upper Midwest will become better organized. Expect scattered strong storms in the afternoon. The Southeast will remain wet and stormy as a stalled frontal boundary lingers over the region and is reinforced by a disturbance passing through it.

## Serious Injury Procedures

*Firefighter Health & First Aid*

Dealing with serious injuries on the fireline can add even more stress to our hectic work environment. In the event a fireline accident occurs, adherence to the following principles is important to insure an adequate and appropriate response is made.

- Before entering the scene, determine whether it is safe to approach. Look for hazards as well as what may have happened. It may be necessary to move the patient or to make the area safe before doing an assessment.
- Provide first aid and assess the extent of the injuries.
- Make contact with your supervisor. Depending on the complexity of the fire, that could be your crew boss, the Division Supervisor, the Incident Commander, or even dispatch. If your fire has a medical plan, follow the plan.
- Provide them with accurate, concise information on the following
  - Number of people injured
  - Type of injuries
  - Severity of injuries (light, moderate, severe, life threatening)
  - Mechanism of injury
  - Vital signs (pulse, respiration, level of consciousness, etc)
- Determine the best method of evacuation. Depending on the severity of injury or availability of resources, this decision may already be made for you.
- Keep the radio frequency clear of non-emergency traffic, provide updates of the patient's condition and await instructions.
- If evacuation is by helicopter, it may be necessary to construct a helispot. Document treatment provided in case it is necessary to send the information along with the patient in the aircraft.
- If the patient needs to be carried to a road, insure enough people are available to work in relays.
- Once the patient is clear, take a moment to write down witness statements, clean up notes and timelines, and document any other pertinent information.
