

**National Interagency Coordination Center
Incident Management Situation Report
Sunday, July 21, 2019 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (89) new fires
New large incidents:	5
Large fires contained:	2
Uncontained large fires:**	22
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	1
Type 2 IMTs committed:	4

Nationally, there are 91 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

[Link](#) to Understanding the IMSR.

One RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 141st Air Refueling Wing (Washington Air National Guard) has been deployed to Fairbanks, AK in support of wildland fire operations in Alaska.

Five wildland fire suppression crews and one Interagency Resource Representative (IARR) are assigned to support large fires in Alberta, Canada.

Active Incident Resource Summary

Alaska Area (PL 5)

New fires:	5
New large incidents:	1
Uncontained large fires:	7
NIMOs committed:	1
Type 2 IMTs Committed:	3

Chalkyitsik Complex (4 Fires), Upper Yukon Zone, BLM. IMT 2 (AK Black Team). Fifteen miles east of Chalkyitsik, AK. Timber. Extreme fire behavior with short crown runs, flanking and backing. Numerous structures threatened.

Shovel Creek, Fairbanks Area, Alaska DOF. IMT 2 (NR Team 6). Twenty miles northwest of Fairbanks, AK. Timber and brush. Minimal fire behavior with creeping, smoldering and isolated torching. Precipitation occurred over the fire area yesterday.

Swan Lake, Kenai-Kodiak Area, Alaska DOF. IMT 2 (EA Gold Team). Started on FWS land six miles northeast of Sterling, AK. Timber and short grass. Moderate fire behavior with creeping and isolated torching. Numerous structures threatened. Area, road and trail closures in effect. Reduction in acreage due to more accurate mapping.

Hadweenzic River, Upper Yukon Zone, BLM. NIMO (Portland). Started on FWS land 26 miles northeast of Beaver, AK. Timber. Moderate fire behavior with single tree torching. Structures threatened.

Kobe, Fairbanks Area, Alaska DOF. Twenty-five miles northwest of Healy, AK. Timber and tall grass. Minimal fire behavior with creeping and smoldering.

Tony Slough, Upper Yukon Zone, BLM. Previously reported incident. Started on Native Corporation land eight miles northeast of Beaver, AK. Timber and short grass. Moderate fire behavior. Structures threatened. Last narrative report unless significant activity occurs.

Rainbow 2, Delta Area, Alaska DOF. Previously reported incident. Eighteen miles northwest of Delta Junction, AK. Timber. Moderate fire behavior with torching, flanking and backing. Last narrative report unless significant activity occurs.

Hidden Creek, Southwest Area, Alaska DOF. Previously reported incident. Thirty miles northeast of McGrath, AK. Timber. Moderate fire behavior with creeping and smoldering. Structures threatened. Last narrative report unless significant activity occurs.

Boundary River, Tok Area, Alaska DOF. Previously reported incident. Started on Native Corporation land 37 miles southeast of Tok, AK. Timber and short grass. Minimal fire behavior with single tree torching and creeping. Structures threatened.

* **Little Creek**, Tanana Zone, BLM. Started on state land six miles east of Ruby, AK. Timber. Moderate fire behavior with flanking and backing.

East Fork Chandalar, Upper Yukon Zone, BLM. Twenty-five miles north of Venetie, AK. Timber and brush. Minimal fire behavior. Reduction in acreage due to more accurate mapping.

Montana Creek, Mat-Su Area, Alaska DOF. Started on private land 13 miles south of Talkeetna, AK. Timber and brush. Minimal fire behavior with smoldering. Residences threatened.

Nayuka River, Galena District, BLM. Started on FWS land five miles east of Huslia, AK. Timber and grass. No new information. Last report unless new information is received.

Predictive Services Discussion: Scattered showers and slightly cooler temperatures will continue over Interior Alaska for Sunday followed by a return of warm temperatures early next week. Hot and dry conditions continue across the western U.S through early next week as the four corners high builds in. Limited monsoonal moisture will spread northward through the west beginning Monday through the work week.

Hazard Tree Felling Safety Tips 1

Felling Safety Category

Felling a hazard tree requires accurate risk assessment and complexity analysis, and demands the sawyer's full situational awareness. In all cases, remember to establish and maintain a secure felling area.

Do not bypass hazard trees without taking some action such as felling or establishing a No-Work-Zone.

Degree of hazard varies with tree size, species, and type/location of defect:

- Stem defects resulting in tree failure, i.e., collapse;
- Weakened sapwood resulting in loss of control when falling trees & limits solid wood for wedging;
- Overhead hazards, i.e., dead or hanging limbs falling on the faller.

Indicators of potential felling hazards:

Dead Limbs: limbs of all sizes and species with decay evident cracking, or loose hung-up limbs. Avoid working under overhead hazards.

Witches Broom: caused by mistletoe infection, limbs can grow very large and heavy (200+ lbs).

Split Trunk: cracked trunk from frost, lightning or wind. Visible evidence of advanced decay indicates serious weakness where the tree could fail.

Stem Damage: caused by windfall, scarring, fire, machine, and animal damage, as well as heart rot diseases.

Thick Sloughing Bark or Sloughing Sapwood: usually found on dead trees. Loose bark on Douglas fir or loose sapwood on wind snapped cedars can dislodge during falling.

Butt and Stem Cankers: usually found on deciduous trees but can occur on Douglas fir and pine. The infected areas weaken the stem.

Fungal Fruiting Bodies or Conks: found on stems may indicate massive interior rot 1 – 2 yards above and below conk. Excessive resinosis (resin flow) also indicates heart or root diseases.

Heavy Tree Lean: may be caused by damaged roots or lifting root mats, shallow or wet soils. In some cases, the tree may have corrected itself which can be determined by looking for corrected top growth.

Root Condition: look for any ground cracks around the base of the tree, signs of decay or fungal conks on the roots.

Cat Face: look for enough solid wood to construct an effective undercut and back cut.
