

**National Interagency Coordination Center  
Incident Management Situation Report  
Wednesday, July 31, 2019 – 0530 MT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (183 new fires)
New large incidents:	5
Large fires contained:	3
Uncontained large fires:**	14
Area Command teams committed:	0
NIMOs committed:	2
Type 1 IMTs committed:	1
Type 2 IMTs committed:	5

Nationally, there are 103 large fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

### Alaska Area (PL 3)

New fires:	1
New large incidents:	0
Uncontained large fires:	1
NIMOs committed:	1
Type 2 IMTs committed:	2

**Chalkyitsik Complex** (4 fires), Upper Yukon Zone, BLM. IMT 2 (AK Green Team). Fifteen miles east of Chalkyitsik, AK. Timber. Moderate fire behavior with isolated torching, flanking and backing. Numerous structures threatened.

**Cornucopia Complex** (9 fires), Upper Yukon Zone, BLM. NIMO (Portland). Twenty-five miles west of Fort Yukon, AK. Timber and brush. Moderate fire behavior with flanking, backing and creeping.

**Swan Lake**, Kenai-Kodiak Area, Alaska DOF. Transfer of command from IMT 2 (EA Gold Team) back to the local unit will occur today. Started on FWS land six miles northeast of Sterling, AK. Timber and short grass. Minimal fire behavior with smoldering. Residences threatened. Area, road and trail closures in effect. Last narrative report unless significant activity occurs.

**Hess Creek**, Upper Yukon Zone, BLM. Previously reported incident. Started on state land 29 miles northeast of Steven's Village, AK. Timber and tall grass. Minimal fire behavior with creeping and smoldering. Structures threatened. Last narrative report unless significant activity occurs.

**Little Creek**, Tanana Zone, BLM. Started on state land six miles east of Ruby, AK. Timber. Minimal fire behavior. Last report unless significant activity occurs.

**Predictive Services Discussion:** A weak cold front will move northeast across Washington state and British Columbia and will begin to flatten the ridge of high pressure that is present over the Great Basin and along the Continental Divide. As it approaches, monsoonal moisture will be drawn northward into Idaho, Wyoming, and Montana where isolated storms will be possible. Scattered wet storms are possible across the Four Corner states. Cooler but dry conditions are expected along the West Coast, as a west-northwesterly flow develops. With the heat building across the Great Plains in response to the presence of the ridge, cooler conditions will develop in the east as a cold front passes and moves offshore. In Alaska, a breezy westerly flow will continue as scattered showers develop over the Interior in response to another approaching frontal system.

## Uninformed on Strategy, Tactics or Hazards

*Operational Engagement Category*

Firefighters who are uninformed on strategy, tactics, or hazards are in conflict with Watchout Situation #5. Before going to the fireline, it is imperative that firefighters obtain information about strategies, tactics, or hazards by asking themselves the following questions:

- Can communications be established to find out strategy, tactics, or hazards? Discuss ways you might establish communications; for example, contacting someone who is already on the fire and asking them what tactics and strategies are working or not working, what hazards they have witnessed, etc.
- Can scouting safely identify potential hazards? Talk about different methods of scouting a fire (e.g., using a lookout from your crew or sending a line scout ahead, utilizing air attack or the spotter on a smokejumper airplane). Discuss what types of hazards you might come across and ways you would mitigate them. For example, arriving at a fire after dark and a being instructed to dig line downhill with the fire below. How could you make this a safe situation?
- Have strategies, tactics or hazards changed since last informed? Discuss situations that might alter the way you are fighting a fire (e.g., wind shifts, resources you expected don't arrive, etc.). Also, think about what new hazards can develop while you are on the fireline (e.g., roots burning out and trees coming down, winds shifting direction and speed, etc.)
- Can you get a briefing from your supervisor? Talk about the importance of constant communications and ensuring firefighters are on the same page with strategies and tactics. For example, if one crew decides to do a burnout, but doesn't let the crew at the other end of the line know what they are doing, then what can happen?
- To reduce the risks:
  - Post lookouts.
  - Determine escape routes and establish safety zones.
  - Consider retreating until you are informed.
  - Don't leave a staging area or operational briefing until you have all the pertinent information. Emphasize ways to inform firefighters about strategies, tactics, and hazards. Tell a story about when you were uninformed and what you did to correct the situation so that you were safe.
  - Use the [Incident Response Pocket Guide, PMS 461](#) standard briefing.
