Predictive Services Discussion: High pressure will remain in place across the Alaskan Interior and will keep temperatures above normal. Convection will become focused along the Alaskan Range and also up in ANWR. The breezy westerly flow across the northwestern portion of the country will intensify slightly while the weakened low pressure area over Southern California begins to drift southwest toward the coast. Breezy and dry conditions will continue across Arizona. Dry line thunderstorm development is expected just east of the Continental Divide in New Mexico. Seasonal temperatures are expected across the East as the low pressure area over eastern Canada drifts southward.

Escape Routes Take 5@2

Operational Engagement

Its 1400...you have been working all morning. How far away have your safety zones become? Safety zones are only good if you can reach them. How long will your escape route take? What is the condition of the crew? How long will it take your slowest member to get there? Are your expectations realistic?

Look at the times below...if your fire blew up right now, can you and every member of your crew make it to your safety zone?

Only Minutes

Loop, Griffith Park	- 5 min
Dude	- 8 min
South Canyon	- 9 min
Rainbow Springs, Spanish Ranch	- 10 min
Hauser Creek	- 11 min
Cart, Blackwater	- 15 min
Pepper Run	- 17 min
