

National Interagency Coordination Center
Incident Management Situation Report
Tuesday, October 1, 2019 – 0530 MT
National Preparedness Level 1

National Fire Activity

Initial attack activity:	Light (143 new fires)
New large incidents:	6
Large fires contained:	6
Uncontained large fires:***	5
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

Nationally, there are 26 large fires being managed under a strategy other than full suppression.

*** Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 3)

New fires:	112
New large incidents:	5
Uncontained large fires:	3

Building Bridges, Alabama Forestry Commission. Started on private land six miles southeast of Valley Head, AL. Short grass and southern rough. No new information. Last report unless new information is received.

Johnson Quarter, Alabama Forestry Commission. Started on private land four miles northwest of Flora, AL. Short grass. No new information. Last report unless new information is received.

Kings Chapel Rd, Alabama Forestry Commission. Started on private land eight miles southwest of Sylacauga, AL. Timber and short grass. No new information. Last report unless new information is received.

Ten Year Average Acres (2009 – 2018 as of today)	6,250,667

***Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov/>

Predictive Services Discussion: The low-pressure area will remain parked over the northern Great Basin and will keep temperatures about 15-20 degrees below normal west wide. Out ahead of the low-pressure area, over the Four Corners Region, a breezy southwesterly flow will be in place. Residual tropical moisture will lead to scattered storms across West Texas and eastern New Mexico. In the East, the record heat will continue to elevate fire potential as the upper level high-pressure ridge pushes temperatures well into the 90s again. Scattered storms will also be possible across the Great Plains and across the Great Lakes along the boundary between the two radically different air masses.

Extended Attack

Operational Engagement Category

After your initial size-up of the fire and/or transfer of command from an initial attack IC, answer the following questions. Repeat this analysis whenever there is a change, or predicted change, in fire conditions.

- Do you have a current fire weather forecast for the fire location?
- Is the observed fire weather consistent with the forecast?
- Have you established a new organizational structure and communicated it to the other forces associated with the fire?
- Can you control the fire with the resources available (either on the incident or soon to be on the incident) under expected conditions?
- Have you developed a plan to attack the fire?
 - Direct or indirect
 - Anchor points
 - Escape routes
 - Head or flank attack
 - Priority areas
- Have you communicated this to all personnel assigned to the incident, including new arrivals?
- Can you see all of the fire area?
- Can you communicate with everyone on the fire and with dispatch?
- Are escape routes established?
 - If you are using the black, is it completely burned and without a reburn potential?
- Are safety and the standard fire orders being followed and/or mitigated?
- Will you contain the fire before the next operational period?
- Have you reported the status of the fire to dispatch?
- Do you have a complete list of what resources have been ordered for the fire?
