

**National Interagency Coordination Center**  
**Incident Management Situation Report**  
**Friday, September 13, 2019 – 0530 MT**  
**National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (79 new fires)
New large incidents:	8
Large fires contained:	13
Uncontained large fires:***	16
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	5

Nationally, there are 44 large fires being managed under a strategy other than full suppression.

\*\*\* Uncontained large fires include only fires being managed under a full suppression strategy.

### Northern California Area (PL 3)

New fires:	16
New large incidents:	0
Uncontained large fires:	8
Type 1 IMTs committed	2
Type 2 IMTs committed:	2

**Walker**, Plumas NF, USFS. IMT 1 (CA Team 4). Eleven miles east of Taylorsville, CA. Timber and medium logging slash. Active fire behavior with isolated torching, uphill runs and flanking. Structures threatened. Evacuations, area and road closures in effect.

**Lime**, Klamath NF, USFS. IMT 2 (CA Team 15). IMT is also managing Kidder 2 incident. Ten miles north of Yreka, CA. Timber and brush. Moderate fire behavior with backing, creeping and smoldering. Numerous structures threatened. Area closures in effect. Reduction in acreage due to more accurate mapping.

**Kidder 2**, Klamath NF, USFS. Ten miles northwest of Etna, CA. Timber and brush. Minimal fire behavior with backing, creeping and smoldering. Area closures in effect.

**South**, Shasta-Trinity NF, USFS. IMT 2 (CA Team 16). Fifteen miles south of Platina, CA. Timber, chaparral and hardwood litter. Active fire behavior with wind-driven runs, uphill runs and flanking. Structures threatened.

**Red Bank**, Tehama-Glenn Unit, Cal Fire. IMT 1 (Cal Fire Team 5). Twenty-five miles west of Red Bluff, CA. Chaparral, brush and tall grass. Minimal fire behavior with smoldering.

**Lone**, Modoc NF, USFS. Five miles southeast of Clear Lake, CA. Timber, brush and tall grass. Minimal fire behavior with smoldering. Sage-grouse habitat threatened.

**Swedes**, Butte Unit, Cal Fire. Five miles north of Bangor, CA. Brush and tall grass. Minimal fire behavior.

**Middle**, Shasta-Trinity NF, USFS. Eleven miles northeast of Junction City, CA. Timber and brush. Moderate fire behavior with backing and creeping. Structures threatened. Area, road and trail closures in effect.

**Predictive Services Discussion:** A breezy westerly flow will develop over the northern tier of the country as a weakening cold front moves east across Montana in the afternoon. While weak, the front will be strong enough to cool temperatures back down to normal levels across the West. Dry conditions will continue across most of Texas except the panhandle where a stalled frontal boundary will serve as a focus point of afternoon convective development. The Southeast will remain hot and humid as the Bermuda High begins to slowly drift east toward the Atlantic Coast. Windy and cooler conditions are expected across the Great Lakes region as a front moves east from Lake Michigan toward Lake Erie.

## **Chainsaw Safety**

*Felling Safety Category*

Chainsaw safety is every saw operator's job.

- Always wear proper P.P.E. when handling or working around chainsaws.
  - Eye protection- approved goggles or safety glasses
  - Hearing protection – ear plugs or muffs
  - Helmet
  - Chainsaw Chaps- proper size and length
  - Gloves-proper size
  - Long sleeve shirt-no loose sleeves
  - Leather boots-no loose boot laces
- Take the time to inspect the chainsaw before operating the saw.
  - Check the chain and bar- Sharpness of chain, Bar seated correctly
  - Check the bolts and screws all around the saw- no missing screws or bolts
  - Check the casing of the saw- no cracked or missing plastic
  - Felling axe and wedges in good condition
  - Saw gas and bar oil in sufficient quantities to meet objectives
  - Basic saw maintenance tools on site and specific to saw in use
  - Review fuel geysering indicators/potential
- Make sure you're aware of your surroundings while operating the chainsaw.
  - Look for and anticipate people working in your area – the chainsaw operator is responsible for controlling the cutting area and communicating with others in the cutting area.
  - Look for any snags or overhead hazards in your area – Maintain recommended spacing of falling teams or others working in the cutting area.
  - Establish consistent communications with spotters/swampers – always minimize personnel working directly at the stump or in the felling area.
  - Are there other risk factors that increase the complexity of the job – loose soils, rocky ground, steep terrain, weather factors or poor visibility, tree condition, others?
- Complete a personal Risk Assessment to determine if you are comfortable completing the task at hand – Don't let job performance pressure force you in over your skill level.
  - Proper training and certification level for personnel running saws and assisting with saw operations
  - Describe your medical response plan and how it is implemented including extricating a severe injury at the work site.
  - If you are not comfortable falling the tree walk away. Notify your supervisor and mitigate the safety issues or turn down the assignment.
