

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, September 21, 2019 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (78 new fires)
New large incidents:	3
Large fires contained:	4
Uncontained large fires:***	13
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	0
Type 2 IMTs committed:	3

Nationally, there are 33 large fires being managed under a strategy other than full suppression.

*** Uncontained large fires include only fires being managed under a full suppression strategy.

Northern California Area (PL 2)

New fires: 7
 New large incidents: 0
 Uncontained large fires: 3
 Type 2 IMTs committed: 2

Walker, Plumas NF, USFS. IMT 2 (CA Team 10). Eleven miles east of Taylorsville, CA. Timber and medium logging slash. Minimal fire behavior with creeping, smoldering and backing. Area and road closures in effect.

South, Shasta-Trinity NF, USFS. Transfer of command from IMT 2 (CA Team 16) back to the local unit will occur today. Fifteen miles south of Platina, CA. Timber, chaparral and hardwood litter. Moderate fire behavior. Residences threatened. Area, road and trail closures in effect. Last narrative report unless significant activity occurs.

Middle, Shasta-Trinity NF, USFS. Eleven miles northeast of Junction City, CA. Timber and brush. Minimal fire behavior with creeping, smoldering and backing. Area, road and trail closures in effect.

Lime, Klamath NF, USFS. Ten miles north of Yreka, CA. Timber and brush. No new information.

***Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov/>

Predictive Services Discussion: A slight warming trend is expected today as a weak ridge of high pressure develops over the West and moves east toward the Continental Divide by afternoon. Temperatures in most areas will be near seasonal averages beneath it. A somewhat strong cold front will move east across the central and southern Great Plains bringing scattered, wet strong storms in the afternoon and evening hours. Hot and humid conditions will continue across the Deep South and along the East Coast as high pressure remains firmly in charge of the weather as it remains entrenched over the Southeast. Warm and dry conditions are expected across New England as the high-pressure ridge to the south extends northward into Canada reaching all the way north to Hudson Bay.

Downhill Fireline Construction Checklist

Operational Engagement Category

Downhill fireline construction is hazardous in steep terrain, fast-burning fuels, or rapidly changing weather. Downhill fireline construction should not be attempted unless there is no tactical alternative. When building downhill fireline, the following is required:

- Crew supervisor(s) and fireline overhead discuss assignments prior to committing crew(s). Responsible overhead individual (TFLD or ICT4 qualified or better) will stay with resources until the job is completed.
- Decision will be made after proposed fireline has been scouted by supervisor(s) of involved crew(s).
- LCES will be coordinated for all personnel involved.
 - Crew supervisor(s) is in direct contact with lookout who can see the fire.
 - Communication is established between all crews.
 - Rapid access to safety zone(s) is ensured in case fire crosses below crew(s).
- Direct attack will be used whenever possible; if not possible, the fireline should be completed between anchor points before being fired out.
- Fireline will not lie in or adjacent to a chute or chimney.
- Starting point will be anchored for crew(s) building fireline down from the top.
- Bottom of the fire will be monitored; if the potential exists for the fire to spread, action will be taken to secure the fire edge.
- Can fire be carried with you?
