

**National Interagency Coordination Center
Incident Management Situation Report
Monday, September 23, 2019 – 0530 MT
National Preparedness Level 2**

National Fire Activity

Initial attack activity:	Light (67 new fires)
New large incidents:	2
Large fires contained:	2
Uncontained large fires:***	9
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	0
Type 2 IMTs committed:	3

Nationally, there are 33 large fires being managed under a strategy other than full suppression.

*** Uncontained large fires include only fires being managed under a full suppression strategy.

***Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov/>

Predictive Services Discussion: A cool, breezy northwesterly flow will be present across a majority of the West as the previous day's system drops south into the Four Corners creating several impacts west-wide. Of slight concern will be a strong northerly, downsloping flow that develops over northern California. Typically, this would be a critical fire weather pattern for the region, but recent precipitation has lessened some of those concerns. Elsewhere across California, hot and dry conditions will develop as a high pressure ridge off shore extends eastward inland and as a thermal trough builds beneath it. The system will bring widespread precipitation to Arizona and New Mexico as it pulls in tropical moisture from Mexico. In the East, expect cooler conditions as a passing front breaks down the hot high pressure ridge over the Southeast. Scattered showers and storms are expected along the Atlantic Coast north of the Carolinas.

Aviation Mishap Response

Aviation Category

Having a written mishap response action posted and accessible to all employees is an important first step. Having a list of actions to follow will ensure that nothing is missed in a stressful, time-critical period. Response plans have to be briefed to all on the crew.

- Immediate, positive action is necessary. Any delay may affect someone's chances of survival.
- Conduct rescue operations keeping the following priorities in mind:
 - Preserve life. Rescuers first!!!
 - Do whatever is necessary to extricate injured occupants and to extinguish fires, keeping in mind the necessity of protecting and preserving evidence.
 - Document and/or photograph the location of any debris that must be disturbed in order to carry out rescues and/or fire suppression activities.
 - Secure the area. Treat the crash site as a crime scene. Arrange for security at the accident scene if necessary. Determine if hazardous materials were on the aircraft. Deny access except to credentialed officials and escorted media.
- Be aware that crash sites can be dangerous due to hazardous cargo, flammable and toxic fluids, sharp objects, disease, adverse terrain, hot/cold weather conditions, and fire.
- Exercise good judgment, utilize available protective devices and clothing, and use extreme caution when working near the wreckage site.
- Do not exceed your physical limitations.

Activity: *Review your unit's mishap response plan with the crew. Consider practicing with a crash rescue drill or scenario.*
