

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, April 29, 2020 – 0800 MT
National Preparedness Level 1**

National Fire Activity

Initial attack activity:	Light (108 new fires)
New large incidents:	0
Large fires contained:	0
Uncontained large fires:***	3
Area Command teams committed:	3
NIMOs committed:	1
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

Nationally, there are 0 large fires being managed under a strategy other than full suppression.

*** Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

[Link](#) to Understanding the IMSR.

This report will be posted Monday – Friday at 0800 Mountain time unless significant activity occurs.

Area Command teams (Team 1 Stutler, Team 2 Sexton and Team 3 Jalbert) have been assigned by the National Multi-Agency Coordinating Group (NMAC) to develop a national COVID-19 wildland fire response plan.

NIMO (Houseman) has been assigned to COVID-19 support at Forest Service headquarters in Washington D.C.

Active Incident Resource Summary						
GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel

Southern Area (PL 2)

New fires: 34
New large incidents: 0
Uncontained large fires: 3

Holcombe Rd, Texas A&M Forest Service. Started on private land thirty-four miles southwest of Ozona, TX. Brush and tall grass. Minimal fire behavior with creeping and smoldering.

Silverking, Big Cypress National Preserve, NPS. Forty miles west of Coral Springs, FL. Timber and southern rough. Minimal fire behavior with creeping and smoldering. Structures threatened. Area closures in effect.

Sunday Afternoon, Florida Forest Service. Five miles southwest of Tamiami, FL. Timber, brush and tall grass. Minimal fire behavior with smoldering. Numerous structures threatened.

***Prescribed fire acres are for reference only and may not reflect the most up-to-date information.

***Official prescribed fire accomplishment reporting occurs through agency specific systems of record.

Predictive Services Discussion: Isolated dry and wet storms will be possible across northern Nevada as a weak cold front approaches from the northwest. Given expected low humidities at the surface, isolated fire starts may be possible. However, fuels in this area are not yet critically dry. Hot and dry conditions will continue across the southern Great Basin and the Southwest as the high pressure ridge over the region continues to move east toward the Continental Divide. Conditions along the Rocky Mountain Front will continue to be dry, but the winds will become light and variable. Cooler than average conditions are expected across the Upper Midwest as a cool area of low pressure moves east toward Ohio and Pennsylvania. In Alaska, dry conditions will continue as a strong high pressure ridge extends inland from the Bering Strait.

LEAD Time

Leadership Environment

Leadership Category

Leadership is defined as the act of influencing people in order to achieve a result. The leadership environment is made up of critical elements that a successful leader must consider in planning for effective action. Those critical elements are:

- **YOU** - the leader, who is ultimately responsible for all action and results.
- **YOUR PEOPLE** - those that you are responsible for.
- **SITUATION** - comprised of the many unique variables that influence a leader's decision such as objectives, conditions, resources available, organizational influences, and others affected by the action.
- **CONSEQUENCES** - the short and long-term effects of your actions.

Leaders constantly assess the elements of the leadership environment and adapt accordingly. Successful leaders understand the interplay of these variables and demonstrate flexibility in selecting appropriate leadership tools and techniques as a situation changes.

Discussion Points:

- Each mission has a different level of risk. Discuss how the 4 leadership environment elements affect perceived risk in a changing environment.
- Each situation is unique and changes over time. Discuss what changes you might predict in your environment today.
- Discuss what leadership tools might be appropriate for those predicted changes today.
