

**National Interagency Coordination Center**  
**Incident Management Situation Report**  
**Monday, August 10, 2020 – 0730 MDT**  
**National Preparedness Level 4**

**National Fire Activity:**

Initial attack activity:	Light (154 new fires)
New large incidents:	3
Large fires contained:	6
Uncontained large fires:***	34
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	7

Nationally, there are 10 large fires being managed under a strategy other than full suppression.

\*\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

**Predictive Services Discussion:** A cold front will continue to slide south and east over the central Plains and Great Lakes with a stalled surface front remaining draped across the northern Great Basin. Axes of the thermal trough will extend northward into the Central Valley and Great Basin from the Desert Southwest with a pre-frontal trough developing in the Columbia Basin ahead of a Pacific cold front. Isolated drier thunderstorms are expected in portions of northern California, the Sierra, and central/northern Nevada. Remaining thunderstorm activity will stay east of the Continental Divide with severe thunderstorms likely along and ahead of the cold front in the Midwest and Mid-Mississippi Valley. Hot and dry conditions will continue over much of Texas with diurnal thunderstorms likely near the Gulf Coast and Southeast.

## My Safety

Leadership Category

An important aspect of safety is individual responsibility for one's own health and safety. Even with the best supervision, each individual firefighter will occasionally be required to make personal decisions concerning their safety. It is important that individual responsibility is taught as the basis for a viable safety program. Some of those individual responsibilities are:

- Fitness for duty. Begin each work shift both mentally and physically prepared for the rigors of wildland firefighting. Getting adequate sleep, maintaining a healthy diet, and proactively participating in physical training is the foundation of "My Safety".
- Utilization of personal protective equipment (PPE). Wear your PPE without being told. Each individual is responsible for performing their own risk assessments. If a hazard is identified that can be mitigated by wearing a particular PPE component it should be utilized. Fireline supervisors have more important duties to focus on other than performing glove patrol.
- Following safe work practices. Using a spotter when backing up vehicles is the prudent and professional course of action. If you are unsure of how to perform a job task safely, ask your supervisor or an experienced coworker.
- Using the correct reference materials is an important aspect of safety. You should have a working knowledge of the Red Book, IRPG, and your local operating guidelines.
- Ensure instructions are clearly understood. Communication is a basic responsibility for all fire personnel. Ask appropriate questions to clarify uncertain issues. Speak up when you observe hazards that may place yourself or others at risk.
- Maintain situational awareness at all times. Awareness is a vital component of "My Safety". Pay attention to what is happening around your area of operations. Always display an awareness of what is happening around you by asking questions or making comments.

**Summary: Do not expect someone else to be responsible for your safety. Take it upon yourself to make "My Safety" your number one priority.**

### Discussions Points:

- Talk about ways you can improve your safety.
- Have your supervisor talk about their expectations for individual safety.
