

National Interagency Coordination Center
Incident Management Situation Report
Monday, August 17, 2020 – 0730 MDT
National Preparedness Level 4

National Fire Activity:

Initial attack activity:	Light (188 new fires)
New large incidents:	16
Large fires contained:	5
Uncontained large fires:***	36
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	6
Type 2 IMTs committed:	6

Nationally, there are 16 large fires being managed under a strategy other than full suppression.

***Uncontained large fires include only fires being managed under a full suppression strategy.

Rocky Mountain Area (PL 4)

New fires:	2
New large incidents:	0
Uncontained large fires:	5
Type 1 IMTs committed:	3
Type 2 IMTs committed:	1

Grizzly Creek, Garfield County. IMT 1 (GB Team 1). One mile east of Glenwood Springs, CO. Timber and brush. Extreme fire behavior with crowning, running and long-range spotting. Energy and transportation infrastructure and numerous structures threatened. Evacuations, area, road and trail closures in effect.

Williams Fork, Arapaho and Roosevelt NF and Pawnee National Grassland, USFS. IMT 2 (SW Team 3) and IMT 1 (GB Team 2) mobilizing. Fifteen miles southwest of Fraser, CO. Timber. Extreme fire behavior with crowning, running, and long-range spotting. Numerous structures and energy infrastructure threatened. Area, road and trail closures in effect.

Pine Gulch, Grand Junction Field Office, BLM. IMT 1 (RM Team 1). Eighteen miles north of Grand Junction, CO. Timber and brush. Extreme fire behavior with group torching and running. Structures, energy infrastructure and sage-grouse habitat threatened. Evacuations and road closures in effect.

Cameron Peak, Arapaho and Roosevelt NF and Pawnee National Grassland, USFS. IMT 2 (RM Blue Team). Fifteen miles southwest of Redfeather Lakes, CO. Timber and closed timber litter. Extreme fire behavior with short crown runs and long-range spotting. Structures threatened. Evacuations, area, road and trail closures in effect.

High Bull, Pine Ridge Agency, BIA. Seven miles northeast of Pine Ridge, SD. Grass and timber. Minimal fire behavior.

Predictive Services Discussion: The Four Corners High will reach peak intensity today as it stretches from northeastern Mexico through the West and to the North Pole. Widely scattered thunderstorms will develop across the West Coast states and western portions of the Northern Rockies. Storms will be a mix of wet and dry. Widely scattered storms will also be possible across central Colorado, New Mexico, and Arizona. The presence of two strong thermal troughs will allow for record heat in many areas. The first trough will extend from the San Joaquin Valley north into Oregon and Washington east of the Cascade Crest. The other thermal trough will be centered over the Great Basin. The heat will gradually build into western portions of the Great Plains as the ridge shifts east slightly. In the East, hot and humid conditions are expected across the South, but the northeastern states will remain cooler than average.

Nomex® is the brand name for a **heat and flame-resistant** textile made by the DuPont chemical company and first marketed in 1967. Today, more than three million firefighters and aviation personnel around the world are protected by structure fire turnout gear, wildland fire PPE, and flight suits and jackets made of Nomex®.

Nomex® IS NOT flame-proof. It burns when you hold a flame to it, but stops burning once the heat source is removed. The thick woven structure of synthetic fibers is a very poor conductor of heat. When exposed to heat, the fibers expand closing the spaces between them insulating the wearer. But to work correctly, Nomex® needs care.

Dirty Nomex®

- Wash Nomex® like normal laundry, but always include a rinse cycle that adequately removes soaps and detergents.
- Nomex® garments should never be subjected to strong oxidizing agents such as peroxides or bleaches. These products harm the physical strength of the fabric.
- Tumble-dry and remove while slightly damp. Over-drying damages the fabric.

Poison Oak/Ivy/Sumac on Nomex® - MTDC researched the laundering of Nomex® firefighting clothing that has been contaminated with urushiol oil (what causes the rash) from poison oak/ivy/sumac exposure.

- MTDC recommends that fire clothing contaminated with urushiol oil be cleaned following normal Nomex® laundering procedures, with a degreaser such as a detergent or a laundry soap, and as soon as possible.
- Extra care should be exercised when handling the contaminated clothing and should be kept separate from unaffected clothing and equipment.
- Put the affected clothing in a marked bag if you are giving it to someone else to wash. Before handling the affected clothing, apply a skin-barrier product such as Ivy Block or Technu®.

Fuel Soaked Nomex® - Flammable contaminants will reduce the thermal performance of any flame-resistant garment including Nomex®.

- Proper and periodic cleaning is essential to maintain thermal protective performance.

Action Item – Nomex® is not effective if it is excessively dirty, fuel-soaked, or has holes. Does your Nomex® need to be washed, repaired, or replaced?
