

**National Interagency Coordination Center**  
**Incident Management Situation Report**  
**Thursday, December 31, 2020 – 0800 MDT**  
**National Preparedness Level 1**

**National Fire Activity (December 23 – December 30, 2020):**

Initial attack activity:	Light (294 new fires)
New large incidents:	8
Large fires contained:	4
Uncontained large fires:***	5
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

Nationally, there are 2 fires being managed under a strategy other than full suppression.

\*\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

## Southern Area (PL 1)

New fires:	184
New large incidents:	7
Uncontained large fires:	4

\* **Footprint**, Wewoka Agency, BIA. Four miles southeast of Cromwell, OK. Hardwood litter, timber and tall grass. Minimal fire behavior. Structures threatened.

\* **Switchback**, Ouachita NF, USFS. Two miles northwest of Bates, AR. Hardwood litter. Moderate fire behavior. Structures threatened.

\* **Big Snag**, Okmulgee Field Office, BIA. One mile east of Weleetka, OK. Timber. Active fire behavior. Structures threatened.

\* **Little Chief**, Osage Agency, BIA. Eighteen miles west of Pawhuska, OK. Tall Grass. Extreme fire behavior with running, torching and spotting.

\*\*\*Prescribed fire acres are for reference only and may not reflect the most up-to-date information.

\*\*\*Official prescribed fire accomplishment reporting occurs through agency specific systems of record.

**Predictive Services Discussion:** An upper-level trough will dig southeast from the Pacific Northwest into the Southwest today into the weekend with a cold front pushing into Mexico. Precipitation will begin to diminish behind the trough with lingering snow and rain showers in the Intermountain West and Pacific Northwest. The southern Plains into the eastern US will receive widespread precipitation today through the weekend with a trailing cold front sweeping through the Southeast over the weekend.

A wetter pattern is expected for the West Coast and eventually most of the West beginning late this weekend and early next week. Multiple upper-level trough passages are forecast to move over the West next week as a trans-Pacific jet develops helping to break down the upper high that has been blocking trough passages over southern California and the Southwest much of November and December. This will result in cooler and wetter than normal conditions for much of the West next week.

The 6MFS Subcommittee and the NWCG Risk Management Committee invite you and your crew to write your own 6 Minutes for Safety discussion!

Submit your topic and discussion points for selection using the contact information at bottom of page.
