

**National Interagency Coordination Center
Incident Management Situation Report
Friday, January 31, 2020 – 0800 MT
National Preparedness Level 1**

National Fire Activity (January 24 – January 30, 2020)

Initial attack activity:	Light (90 new fires)
New large incidents:	0
Large fires contained:	0
Uncontained large fires:***	0
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

Nationally, there are 0 large fires being managed under a strategy other than full suppression.

*** Uncontained large fires include only fires being managed under a full suppression strategy.

TOTAL ACRES		0	0	0	0	683	56	739

***Prescribed fire acres are for reference only and may not reflect the most up-to-date information.

***Official prescribed fire accomplishment reporting occurs through agency specific systems of record.

Predictive Services Discussion: Warm and dry conditions will continue across Southern California, the Southwest, and the Great Basin through Saturday as high pressure remains firmly entrenched over the eastern Pacific Ocean. The high pressure ridge will be flattened out by a strong, wet cold front that will move on shore and into Northern California and the Pacific Northwest on Saturday bringing cooler temperatures and snow. Southwesterly winds will become gusty across the southern Great Basin and the Four Corner's region. Significant snow will be possible across Colorado, Kansas and the Panhandles of Texas and Oklahoma Monday night and Tuesday as the front passes. A strong north to northwesterly flow pattern will set up over the West for the remainder of the week and will keep temperatures below average. Mountain snow showers will continue to add to the snowpack across the Pacific Northwest and the Northern Rockies while most other areas will remain dry. In the East, three wet systems will move across the eastern portion of the nation over the next week. This will continue to keep fire potential low during the period.

LEAD Time

Leading Up

Leadership Category

Looking out for our people includes not only those who work for us but also our leaders and peers. Leadership is about influencing others to accomplish tasks that are in the best interest of our organization which often means influencing those above us and **leading up**. Similarly, we are open to upward leadership – and, in fact, encourage and reward it.

Fire leaders are expected to lead in many directions, an expectation that increases complexity and risk. Summoning the courage needed to intervene and influence peers or leaders above can be difficult, especially if providing unwelcome feedback about behavior or pointing out an alternative to a potentially bad decision. In high-risk environments, no one can afford to assume that anyone has all the answers. To build the kind of healthy and resilient culture required in the wildland fire service, we lead up—holding our leaders accountable, providing unvarnished situational awareness in challenging situations, and offering unbiased and viable alternatives.

Discussion Points:

- How can we practice leading up?
- Describe a situation where leading up took place. How was the situation affected?
- Describe a situation where there was opportunity for leading up but it was not done. How was the situation affected?
- Discuss leading “laterally”: influencing peers or those with similar responsibilities.
